

Ariane 6 - First Commercial Flight

1/136 Scale Paper Model Instructions

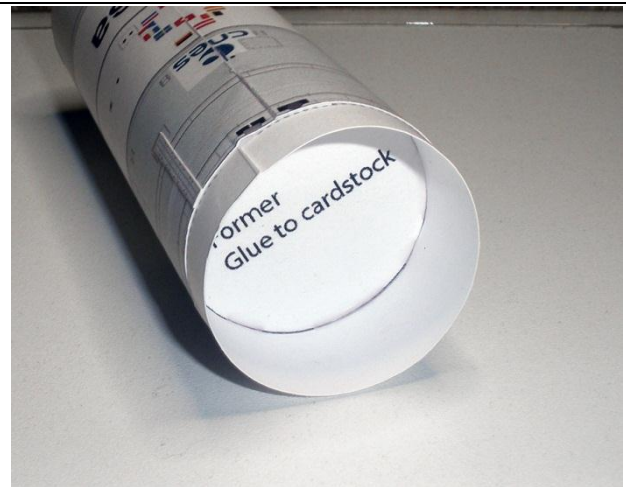

NOTE: The above pictured model was a test build model, the final one may look a little different due to some final adjustments.

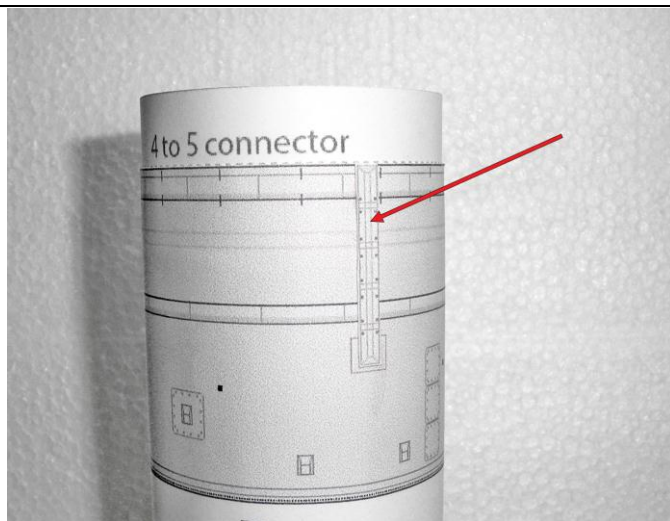

Make sure the printed lines are aligned.

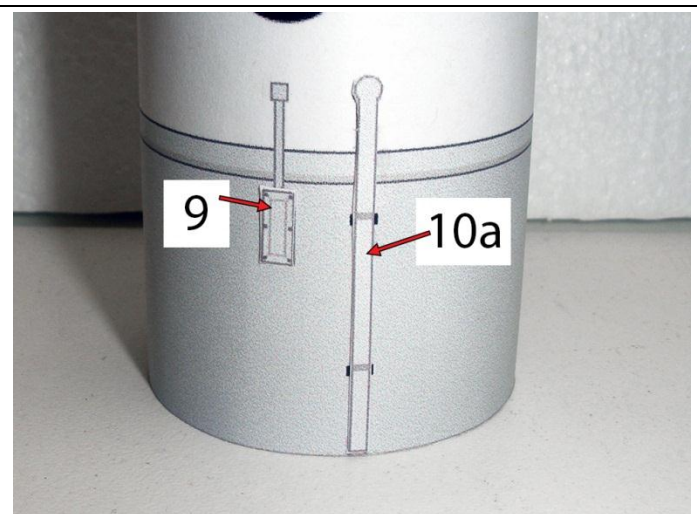

Curve the top tabs in as shown, may apply some glue inside to help hold its shape.

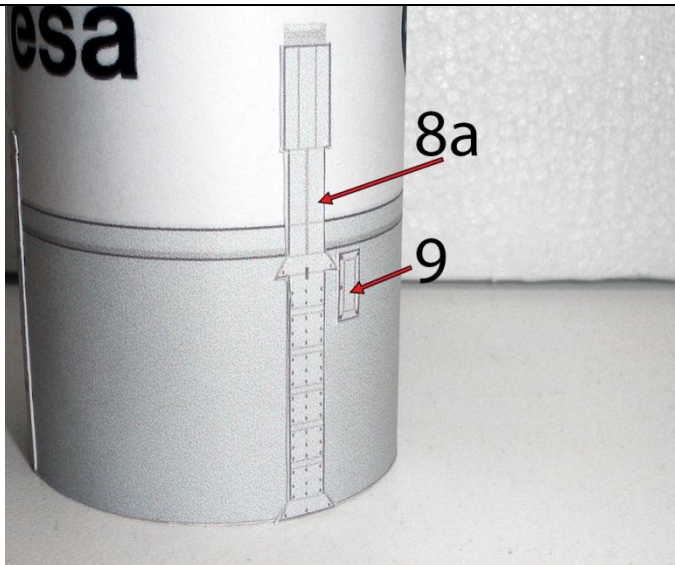

Glue the former inside against the 4 to 5 connector.

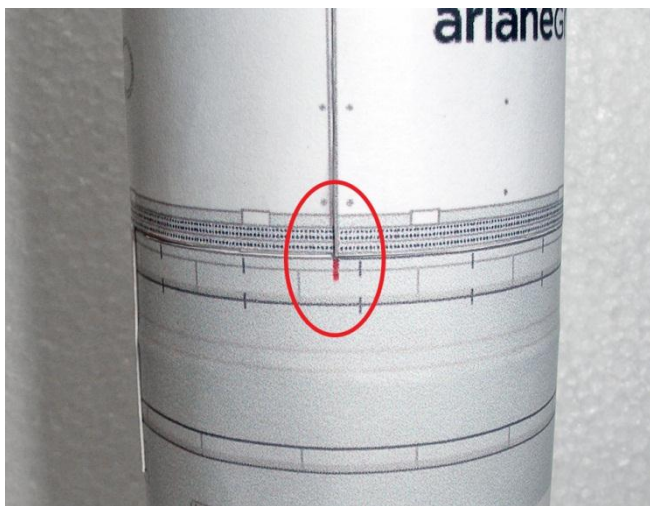

Glue parts 7 onto the two labeled areas at the top.

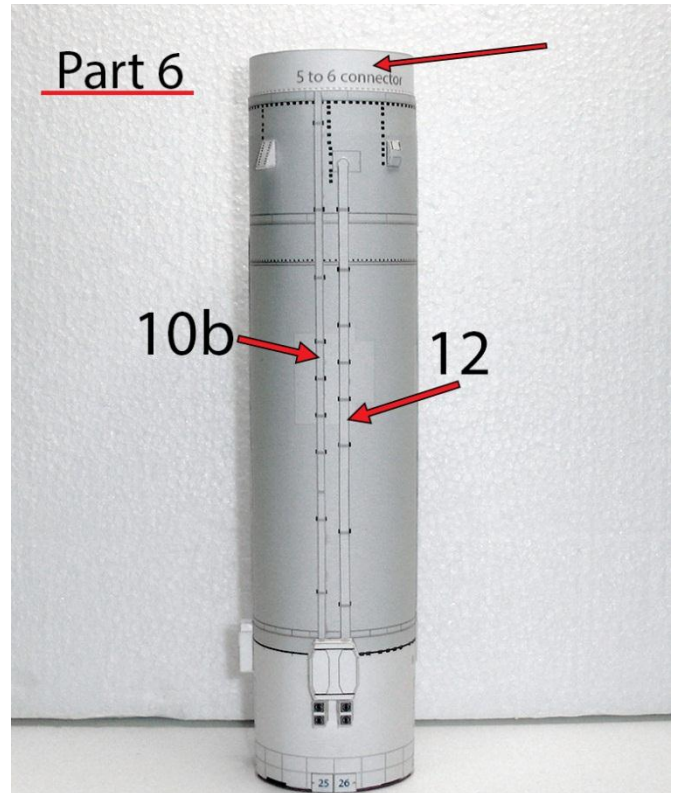

Glue on the labeled areas on part 5

Glue on the labeled areas on part 5

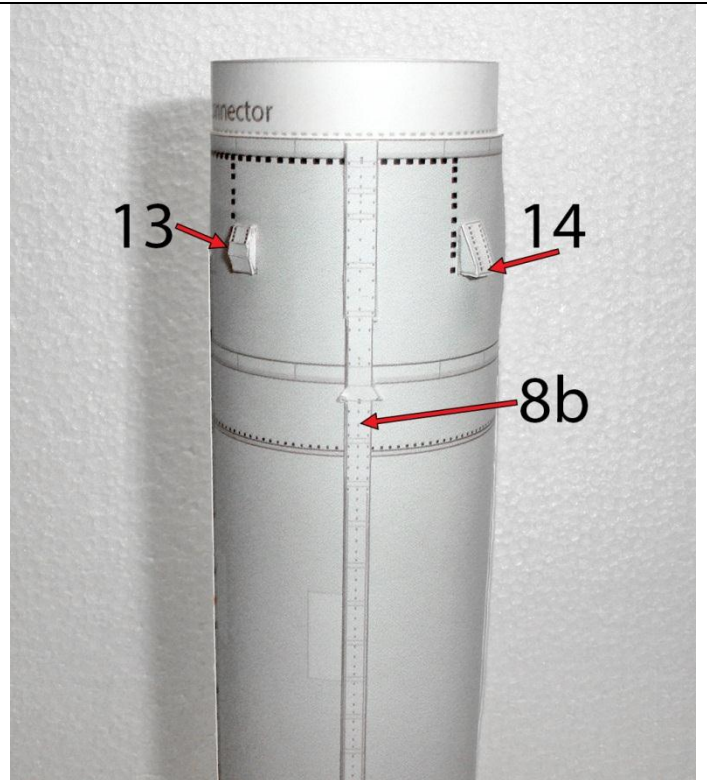

Align the seem on part 4 to the red marker on part 5

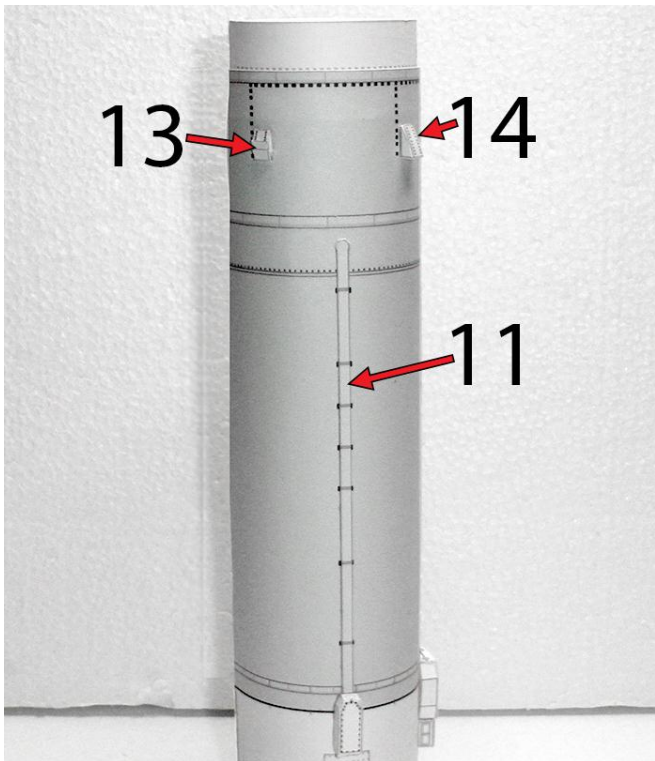

Glue 10b and 12 to the labeled areas

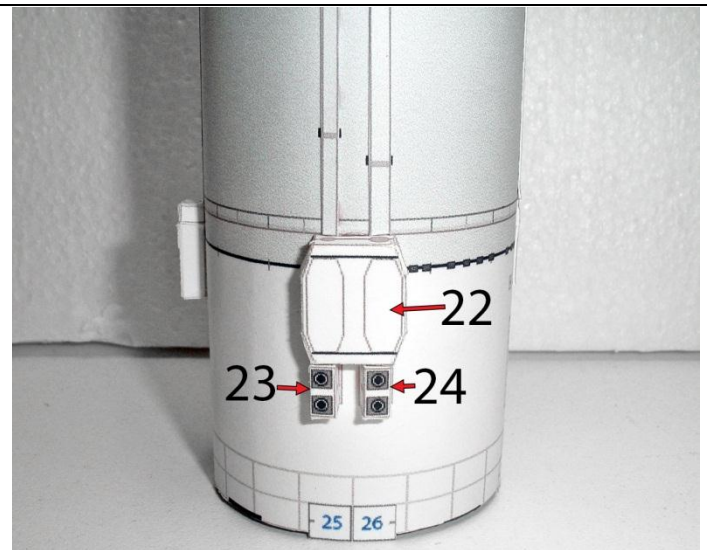

Glue the former inside against the 5 to 6 connector.

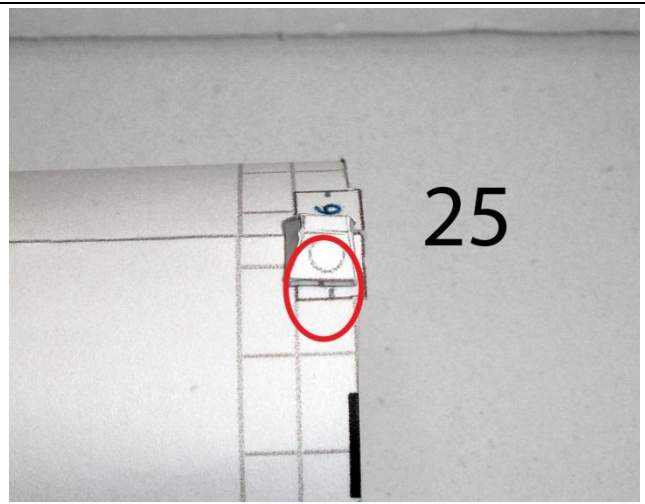

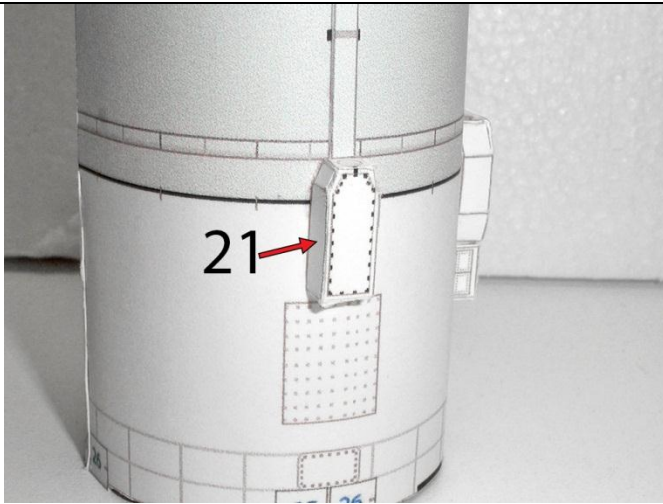

Glue on the labeled areas

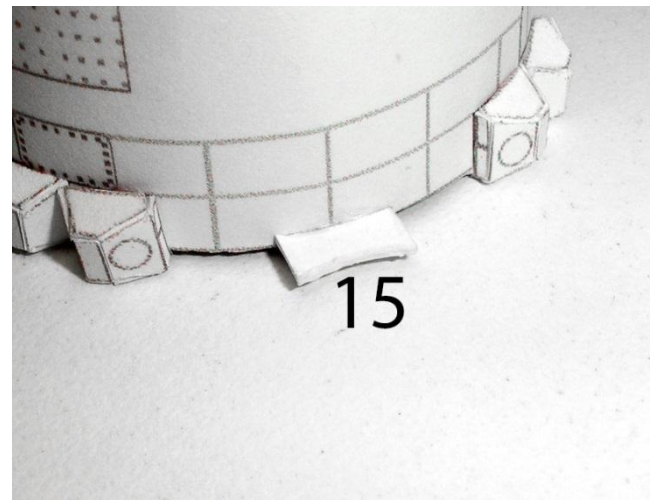

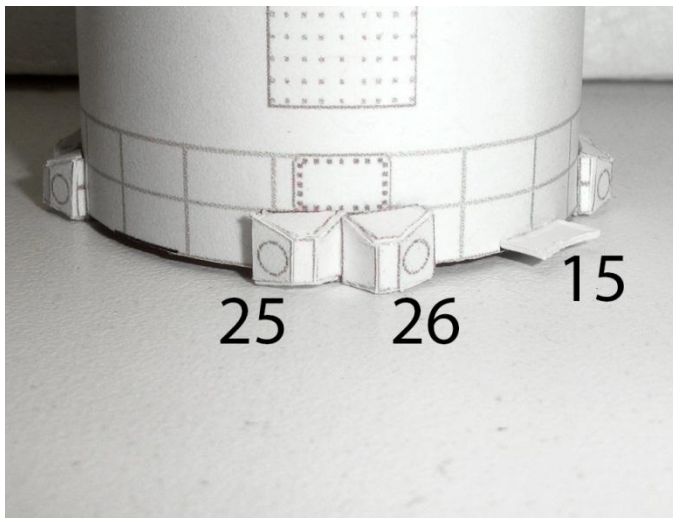

Glue on the labeled areas

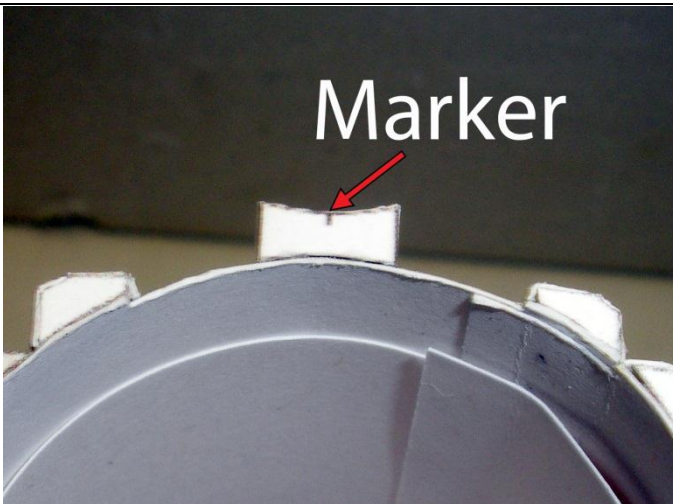

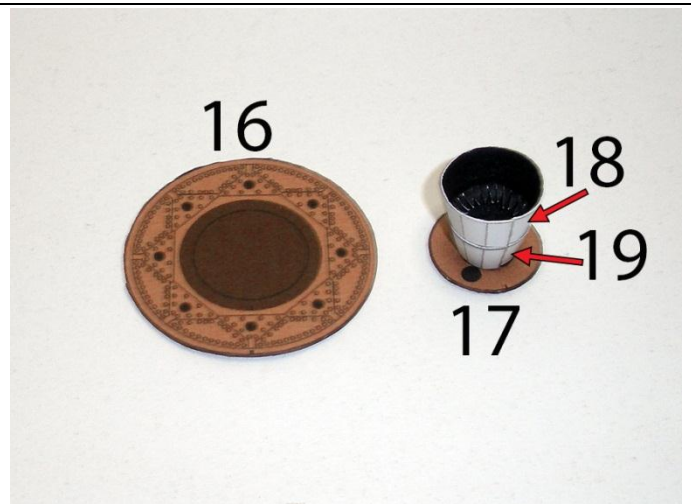

Glue 25 and 26 to their labeled areas on the bottom of part 6. Match the markers on the parts to the markers on the bottom (red circle).

Glue 15 on the two thick black lines on the bottom. Should locate under parts 14 near the top.

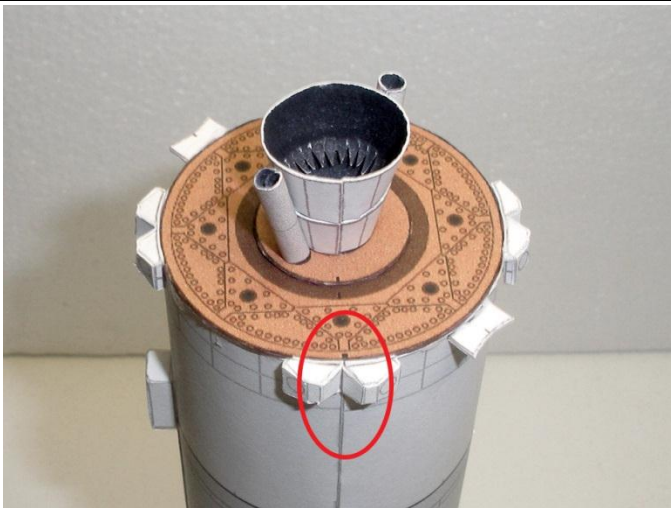

Marker points outward.

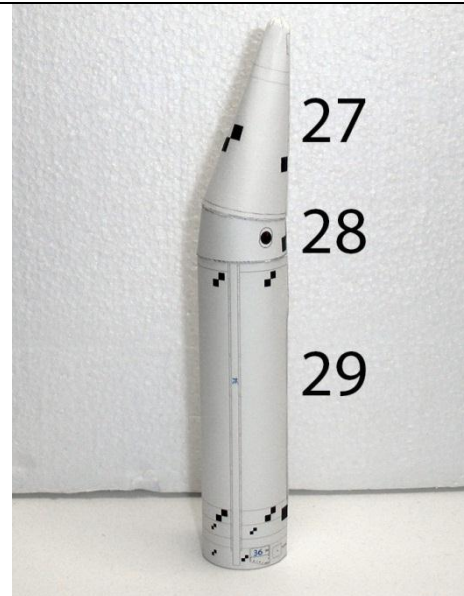

Glue parts 20 on the small black circles as shown.

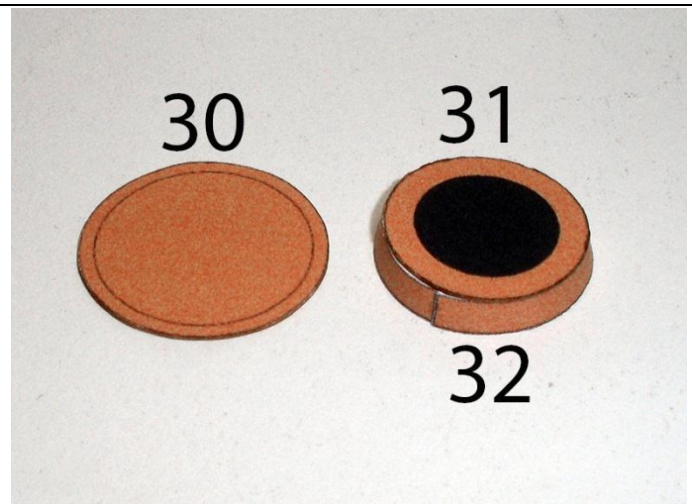

Glue to the bottom inside the four tabs where parts 25 and 26 are glued on. Match the black marker on 16 to the seem on the body (red circle).

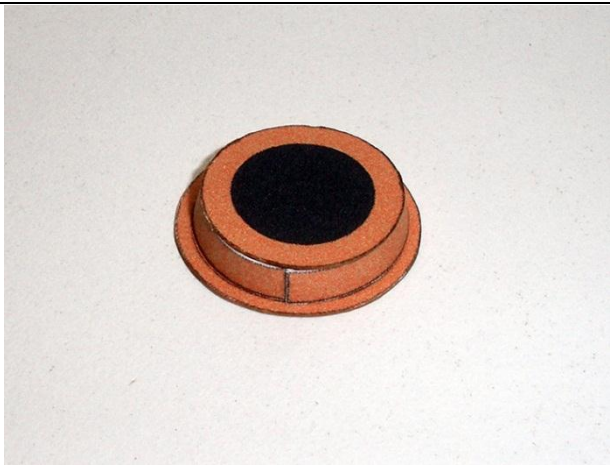

Boosters-make two of these...Match all seems together. Build one at a time, each booster is a little different.

Curve the top tabs on part 27 in as shown, may apply some glue inside to help hold its shape.

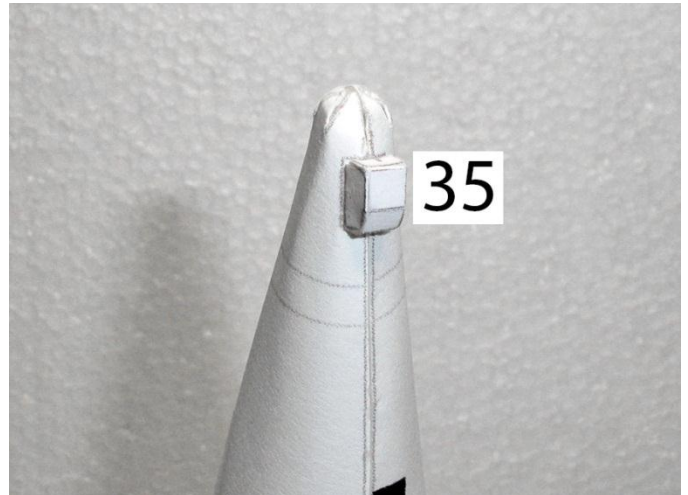

31 sits on top of 32

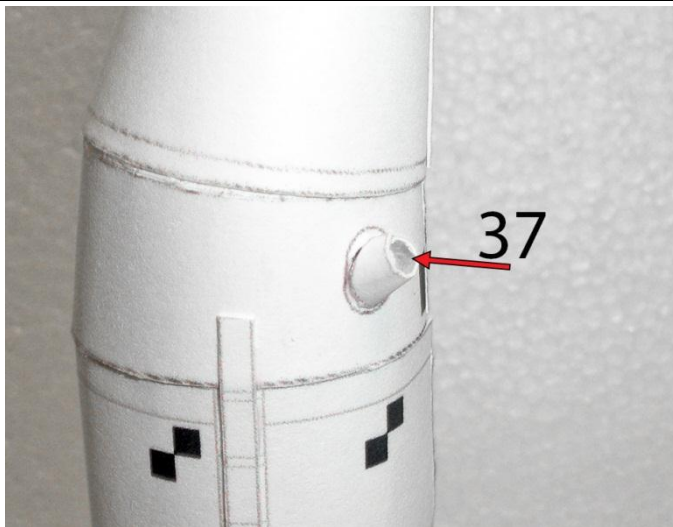

NOTE: these parts will look different on the final model

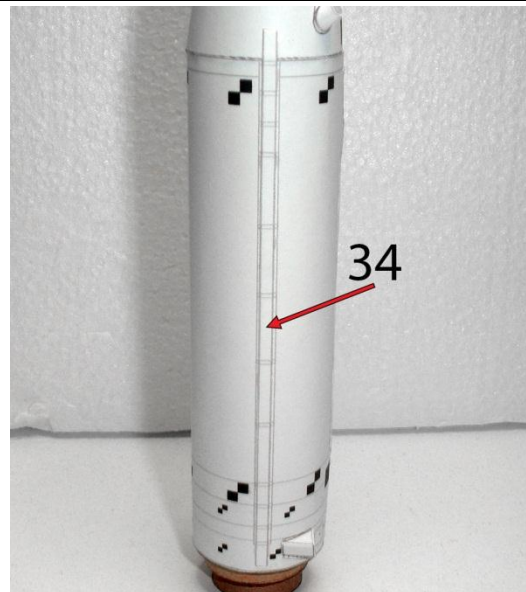

Glue to the bottom of the boosters

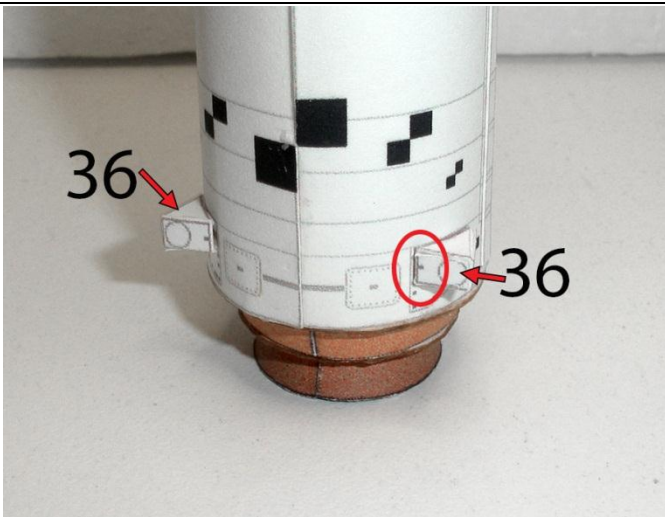

Glue 35 to the rectangle at top of the nose cone of each booster.

Glue on the two black circles

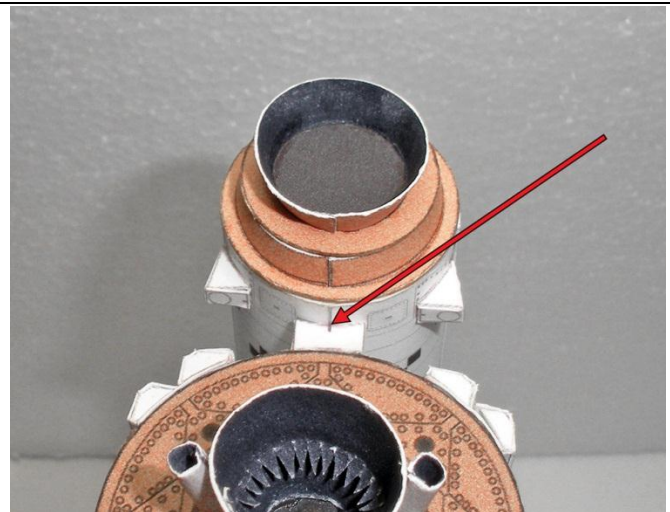

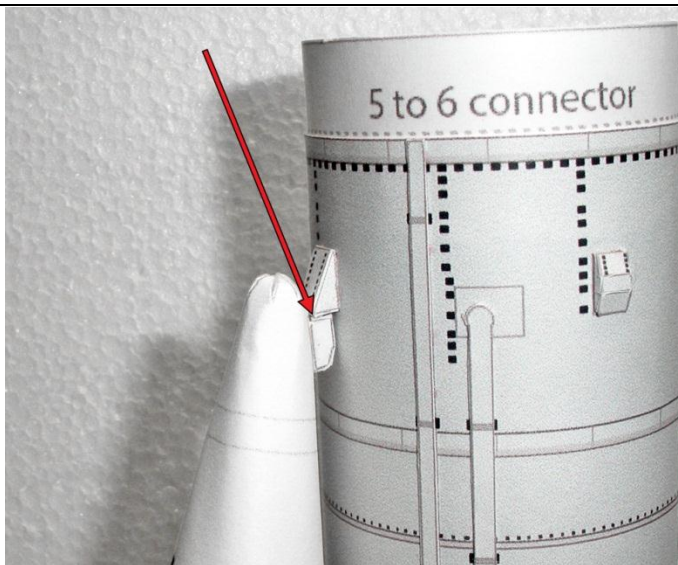

Lines on 34 will match perfectly with the lines on the body.

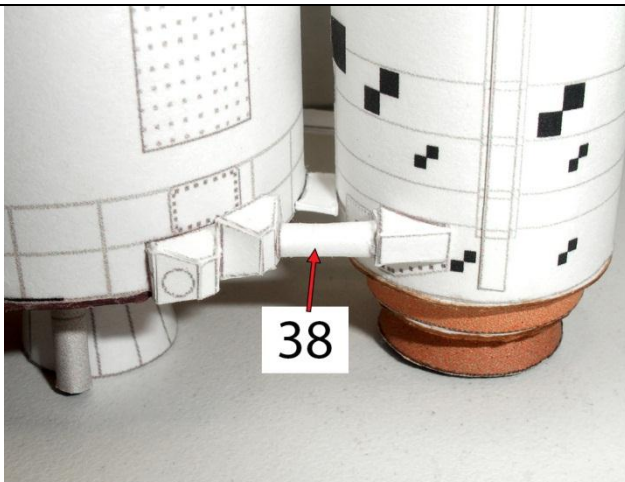

Glue 36 on the labeled areas on the bottom, match the two markers together (red circle).

Each booster has its name printed on top of the parts sheet. Glue the proper booster on the bottom core where parts 14 and 15 are glued.

Match the seem at bottom of each booster to the marker on parts 15. Let the glue dry.

Roll 15 to a tube. Glue onto the circles on each engine mount as shown.

Glue one, then glue the other on the other side of the booster. The second one may have a tight fit.

Glue to two halves together while keeping the seems aligned.

Your model is done.
