

Black Brant XI Sounding Rocket 1/33 Scale Paper Model Instructions

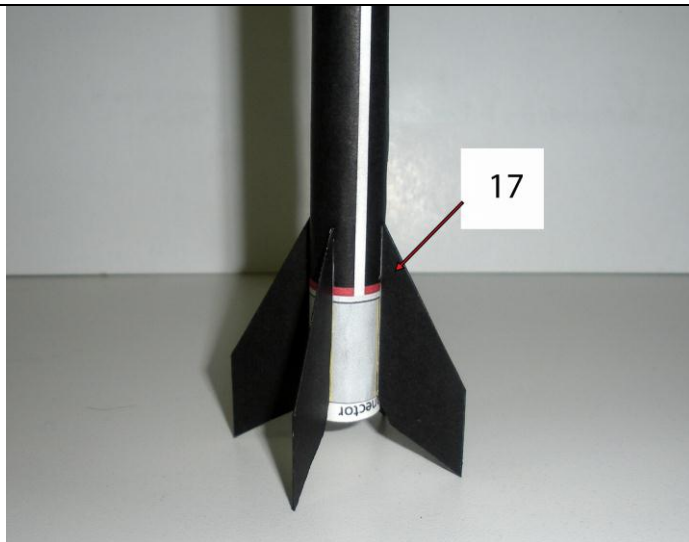

May see small differences between the model and the rocket that appears in various photos of the Black Brant XI rocket. This is due to various payloads the rocket can carry.

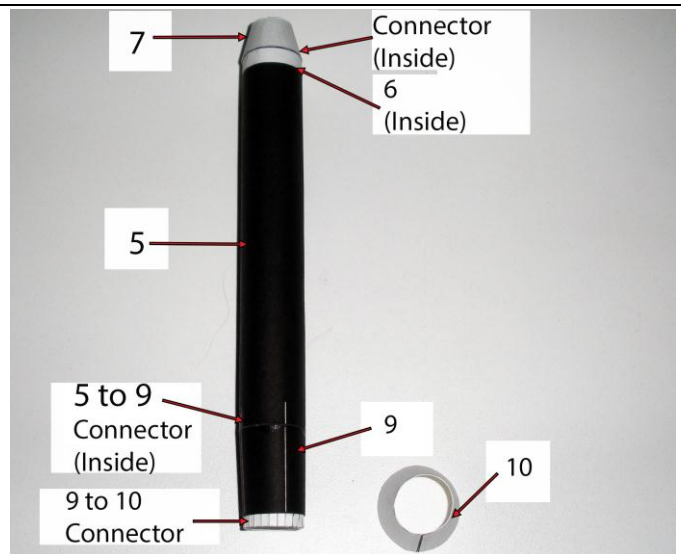

3rd stage

Glue **3** inside against the **1 to 2 connector**.
Glue **4** inside against the **2 to 7 connector**.

Assemble the nose cone and glue on top of **Part 1**.
Glue Part 1 assembly on top of **Part 2**.

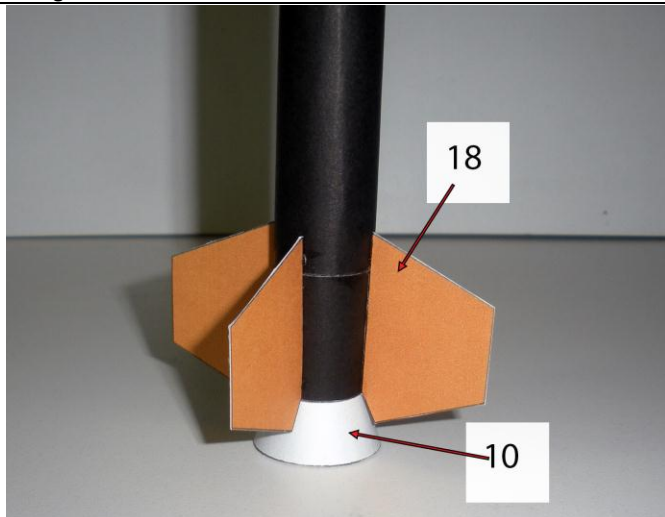

Glue each of the fins onto the yellow lines at the bottom.
Match the top of each fin to the top of each line.
3rd stage is done.

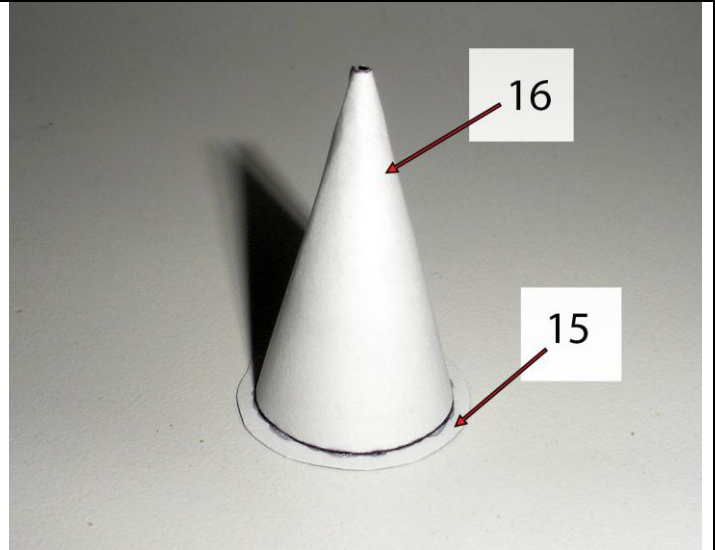

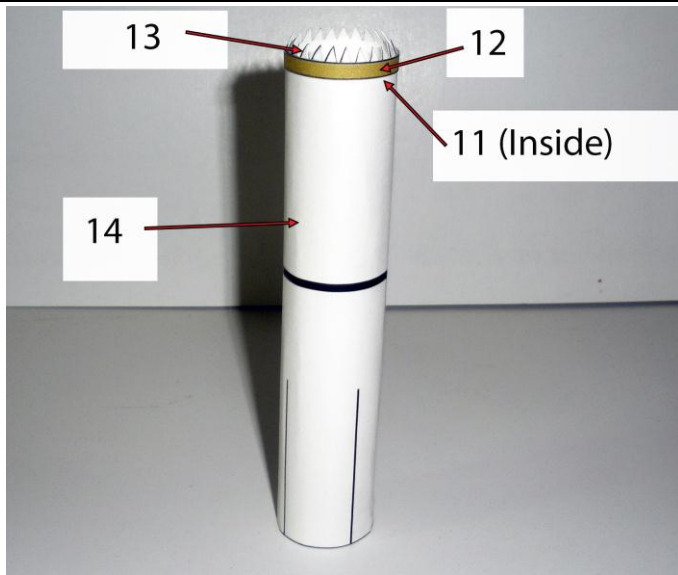

2nd stage

Glue **6** inside against the connector at the top of **5**.
Glue **9** to the bottom of **5** (small end down), match the lines.

Match the TOP of each fin to the top of each line
Glue **10** as shown, match the seems of 10 and 9.
2nd stage is done.

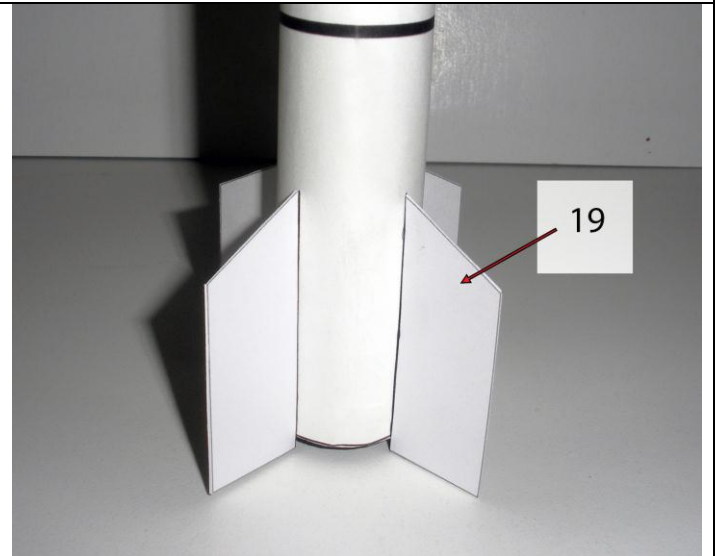

1st stage.

Glue **4** inside against the connector (**13**). **12** is wrapped around the top.

Cut out the black circle from 15. Roll 16 to a cone. Glue 16 to the back of 15 for embedded nozzle.

Glue inside the bottom of the 1st stage.

Match the TOP of each fin to the top of each line. There should be a small over hang at the bottom.

1st stage is done.

Glue the 2nd stage on top of the first stage matching the seems. Make sure they are straight, let dry.

Glue the 3rd stage on top, matching the seems. Make sure it is straight with the rest of the rocket and let dry.

Your model is done.
