

Courier-1B

1/20 Scale Paper Model Instructions

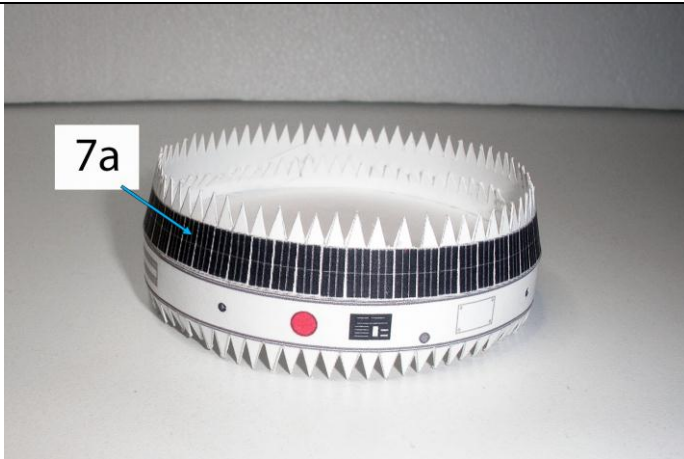

NOTE:
Keep all seems aligned for proper graphics placement.

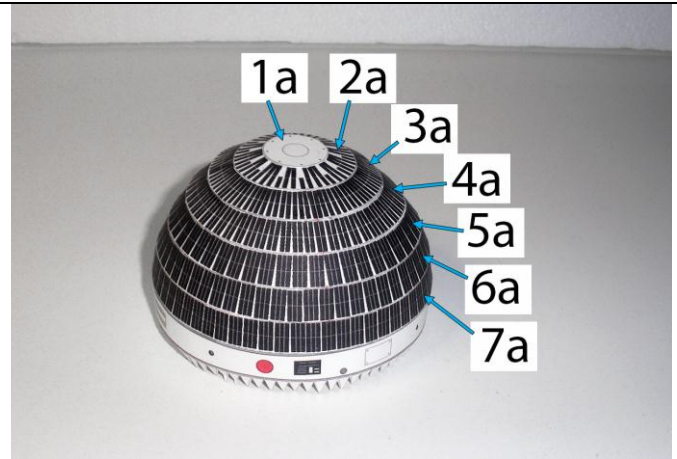

Poke small holes on the four black dots on 8 first, then roll to a ring. Part 9 is optional but suggested to give the model a perfect round shape and strength.

Can replace part 9 by gluing a strip of cardstock inside part 8 for strength. If you do this, repoke the four small holes on the black dots.

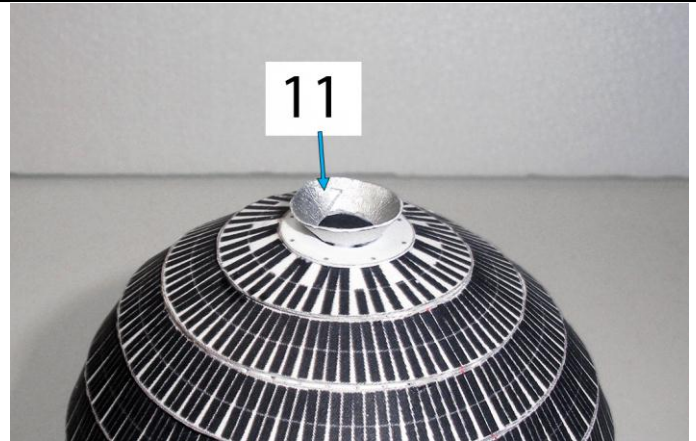

Note the graphic locations on part 8. Align the two seems together.

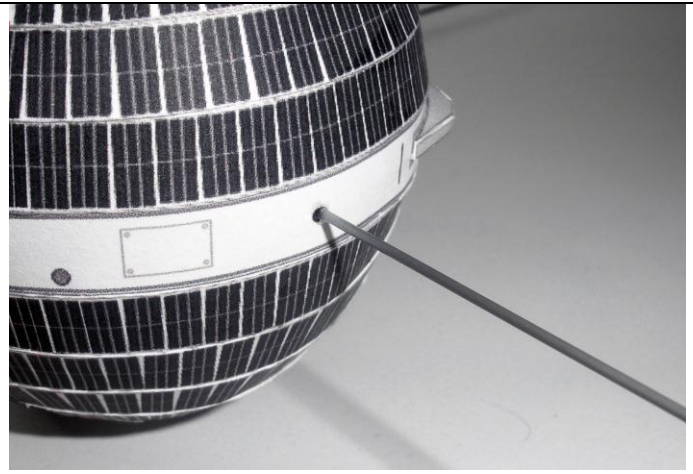

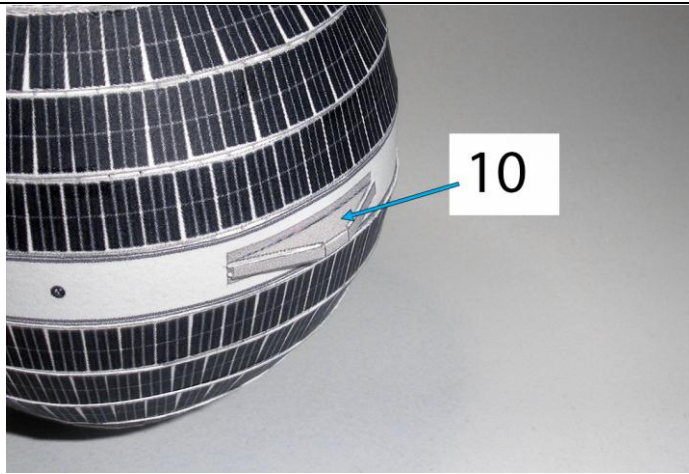

Remember to keep all seems aligned for proper graphics placement.

Do the same for parts 1b – 7b (bottom half of the spacecraft)

11 is glued on 1b as shown.

Prepare the four antennas according to instructions on page 3 on the parts file.
 Add a drop of super glue in the holes on the black dots and insert the antennas around 1 mm into the hole and hold in place until the glue takes hold.

Your model is done
