

Experian Boost Rocket

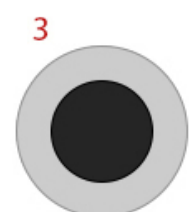

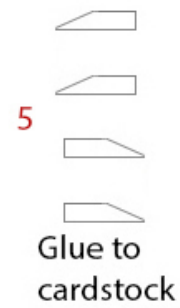

Experian Boost is a free, opt-in product designed to help individuals struggling with building credit. Consumers can use the tool to add more information to their credit history in order to potentially generate a higher credit score. It is a product of Experian, one of the three major credit reference companies in the United States.

One of the Experian commercials featured a rocket being launched. The rocket looked similar to the SLS (Space Launch System) without the two solid rocket boosters.

In this commercial, Experian says they are launching something revolutionary. With Experian Boost, you can raise your credit score instantly. It urges you to be the first on board to get ready to boost your credit scores free.

Thought this would make a nice, simple paper model to build and enjoy.
