

Long March-2C
Long March-2C with actuating grid fins
(Easy Version)

1/100 Scale Paper Model Instructions

This EASY VERSION does not require you to cut out the smart exhaust system (red dots) from part 2 and part 2a. Parts 6 – 14 (found in the detailed version) were deleted because they are no longer needed.

NOTE: these instructions will work for the Long March 2C and Long March-2C with actuating grid fins models.

Keep all seams aligned for proper graphics placement.

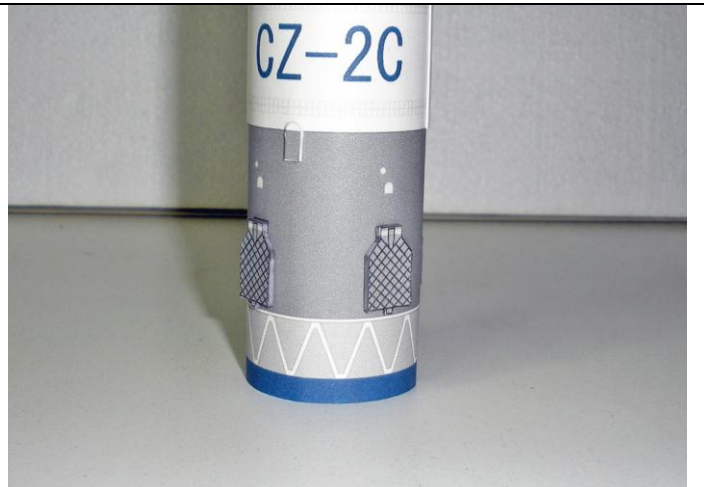

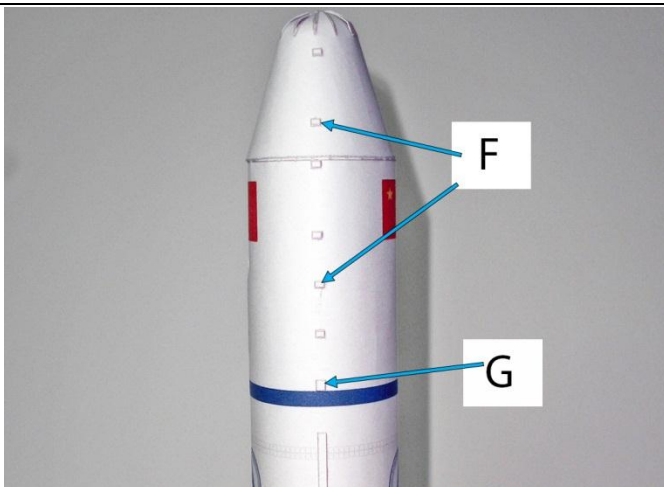

Part 2 – 2nd stage

Part 1 – nosecone, roll the top to a dome as shown.

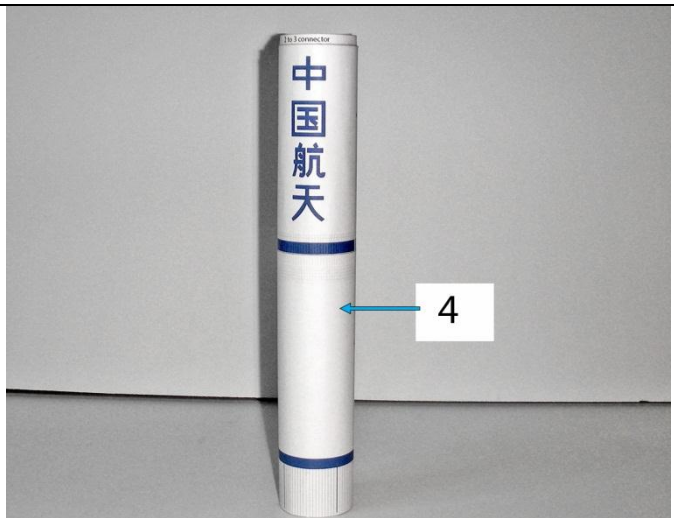

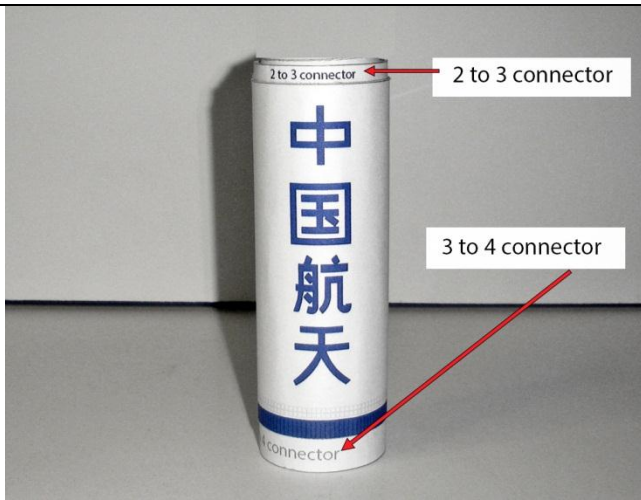

Glue parts C, D and E to their labeled areas on the body as shown.

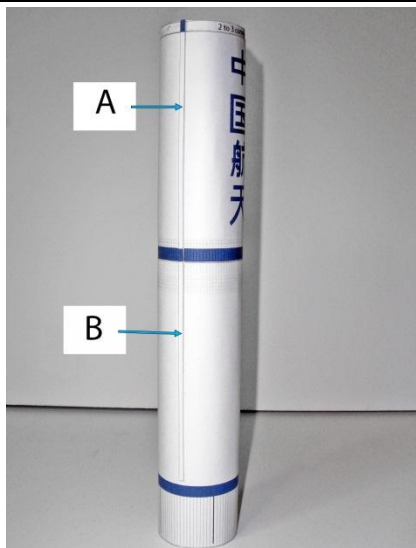

For Long March-2C with actuating grid fins only...
Glue the grid fins onto the rectangles on the body as shown.

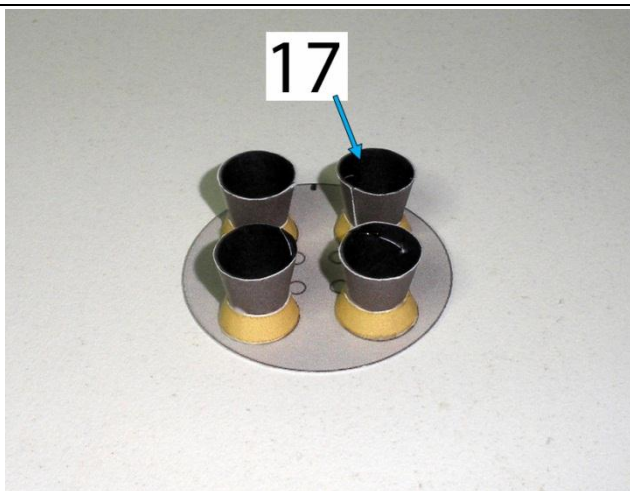

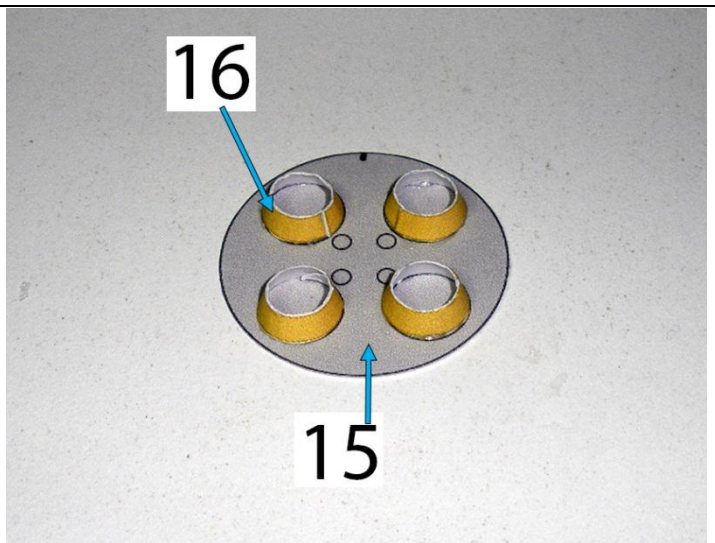

2nd stage is done.

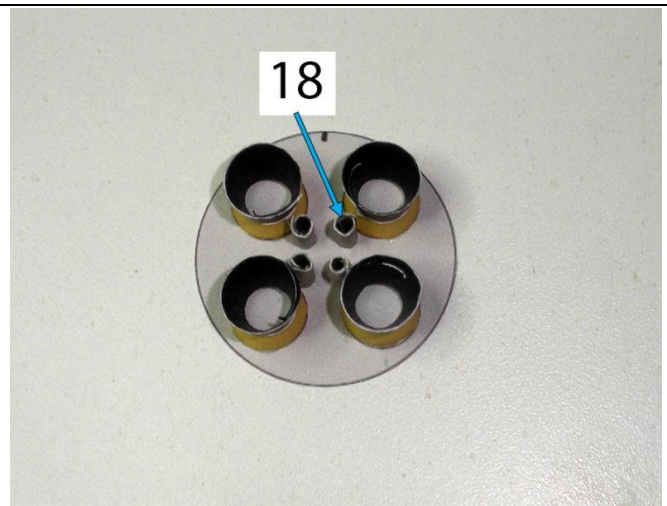

Roll-glue 4 to a tube, glue to the bottom of 3 using the connector. Match the seems on both parts.

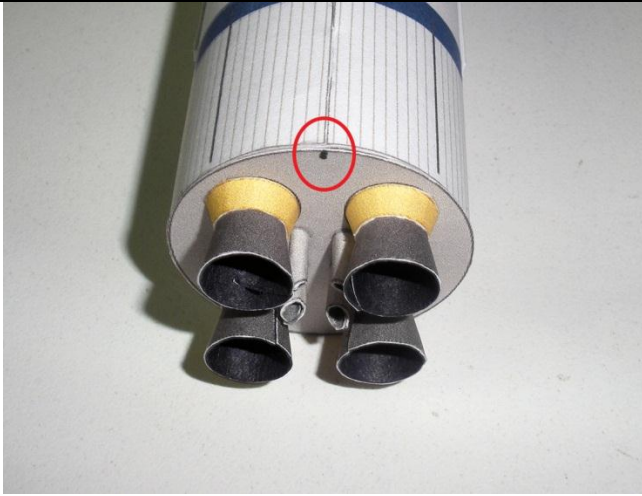

Glue these onto the labeled areas.

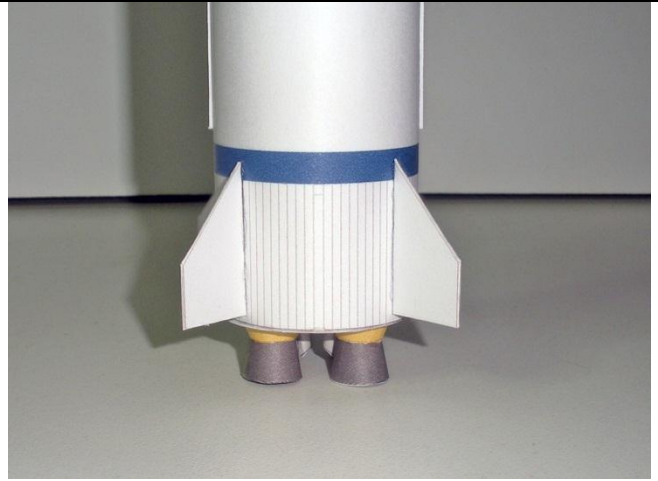

17 should slide inside of 16. The nozzles should have a very slight outward angle.

Match the marker to the seem.

Glue the fins on the four black lines as shown.
Glue the 1st stage to the 2nd stage using the 2 to 3 connector.

Your model(s) is gone.
