

## Mars Express

### 1/20 Scale Paper Model Instructions

#### NOTE:

This model is mostly dark in color, for a better looking model, color edges of all parts with a grey color marker.

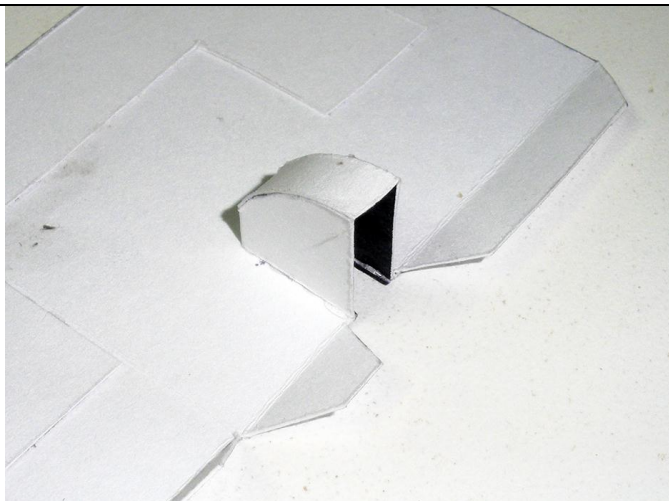

Poke small holes on the two grey dots (Blue arrows) for the solar array support rod.

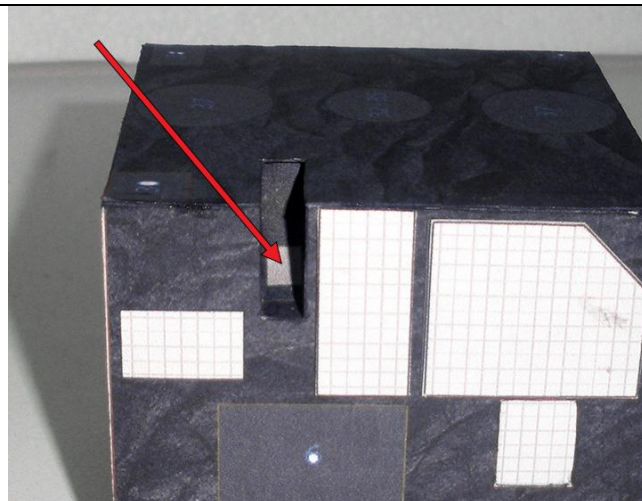

Cut out all blue areas from the body. Glue A – C to the backside over the openings as shown making sure the lines are straight.

Glue a piece of cardstock to the backside of the TOP of the body (above the dish side) to help keep it flat.

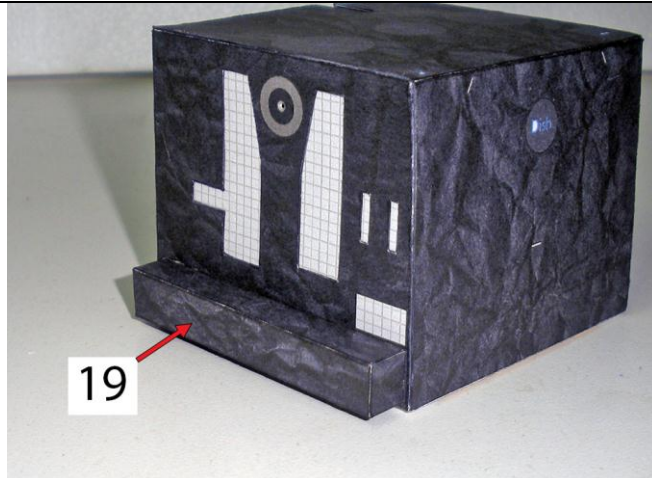

Glue 2 and 3 on their labeled areas as shown.

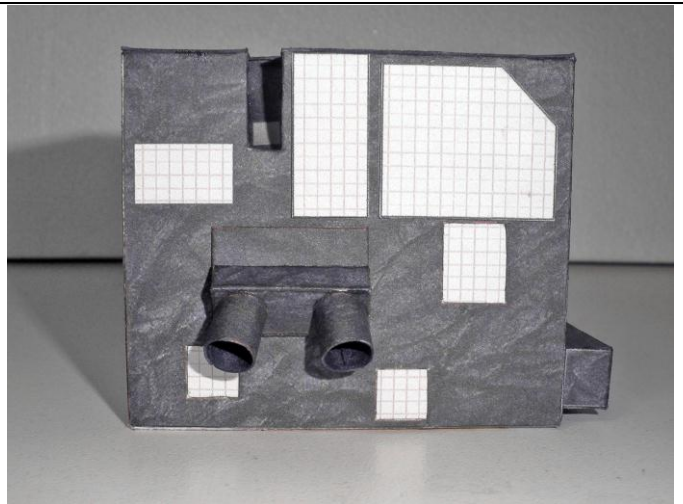

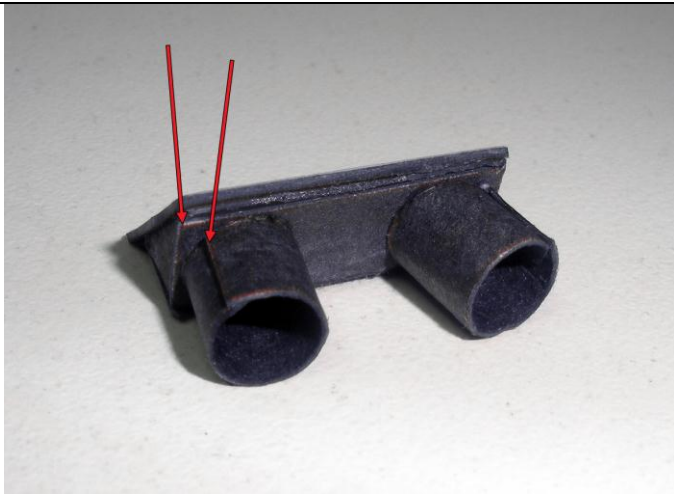

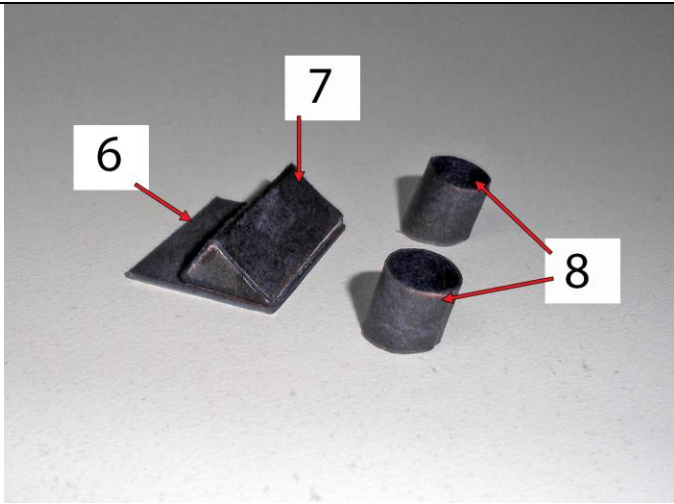

Assemble part 2 with graphics inside. Glue to the backside of the body as shown at the very top edge. Flat part of 2 should be at the bottom, see next photo.

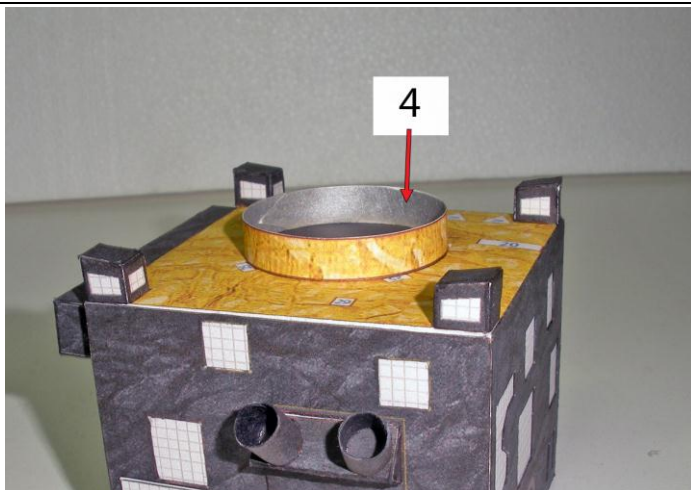

Fold to a box.

Align seems on 8 to the corners as shown for proper angles.

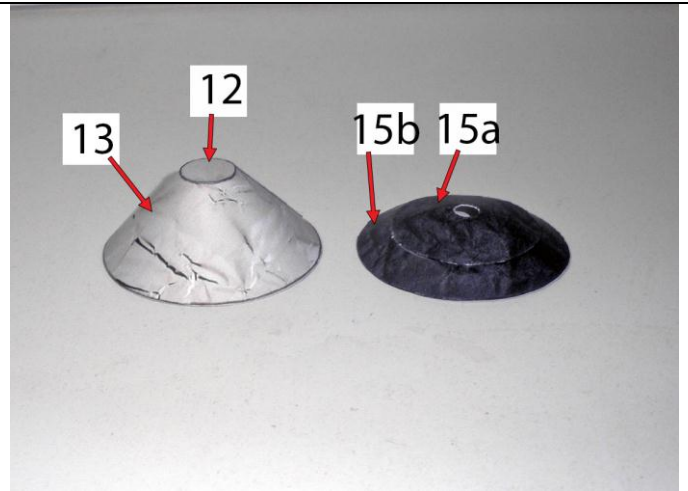

Glue 10 and 11 to their labeled areas as shown, note the angles compared with the body.

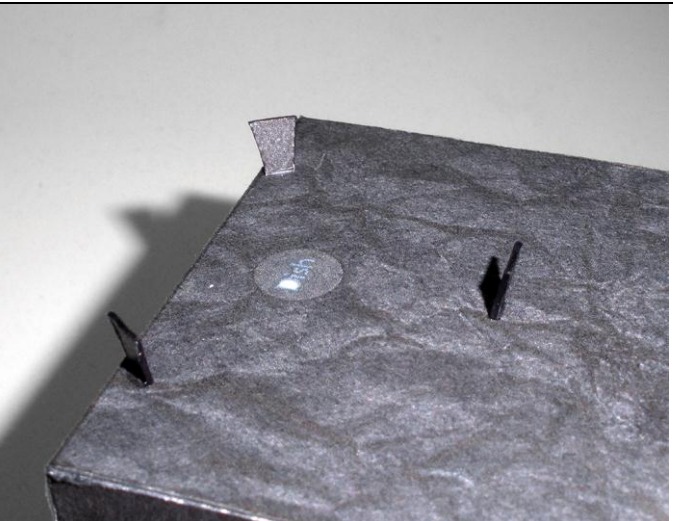

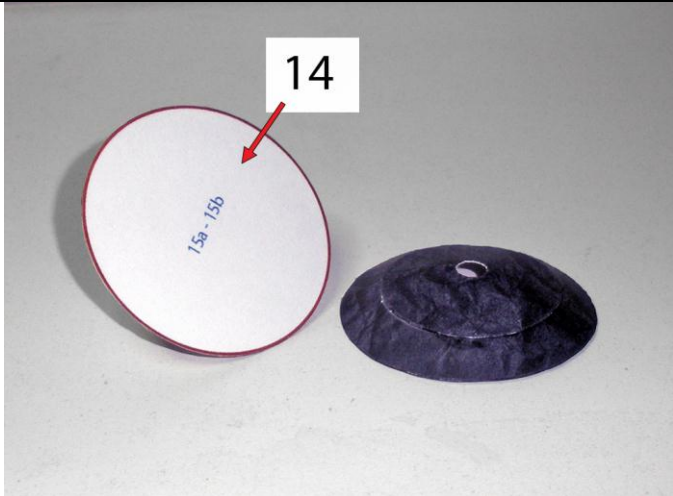

Glue 18 to the grey dots on 10 and 11.

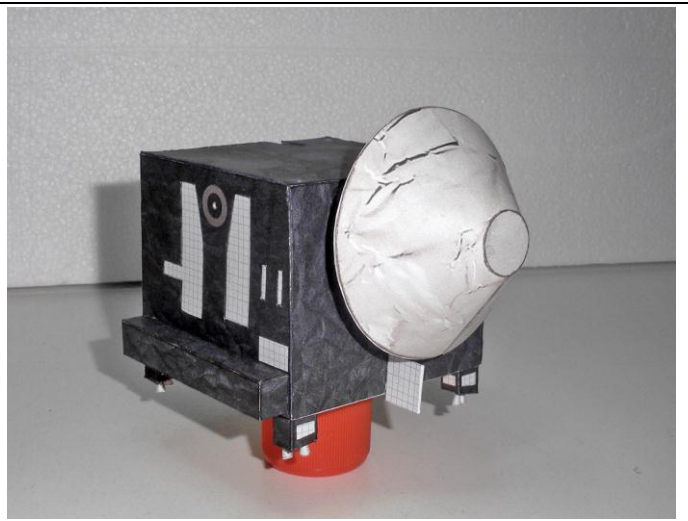

Part 5

Glue 14 to the bottom of 13.

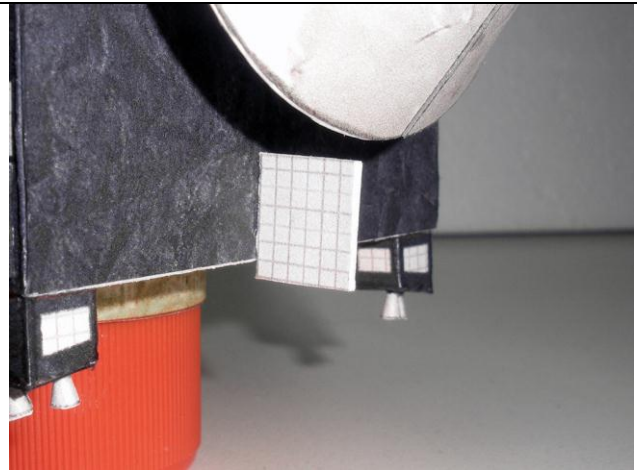

Glue X to the three lines around the dish area as shown with a slight angle.

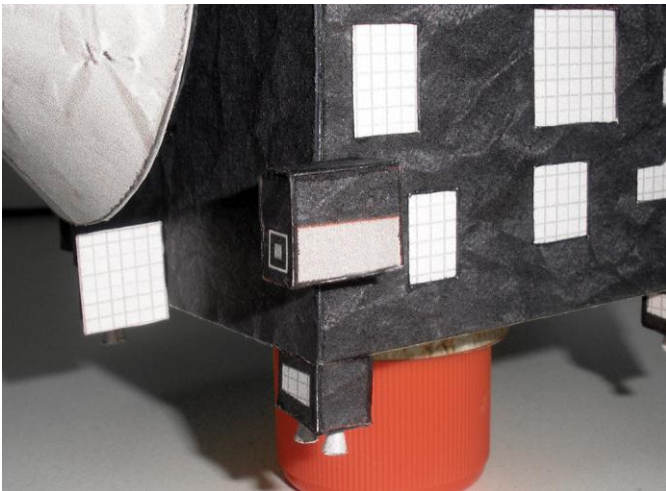

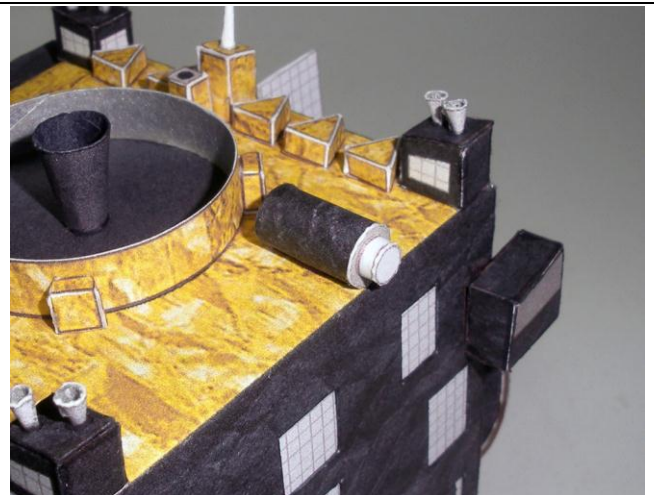

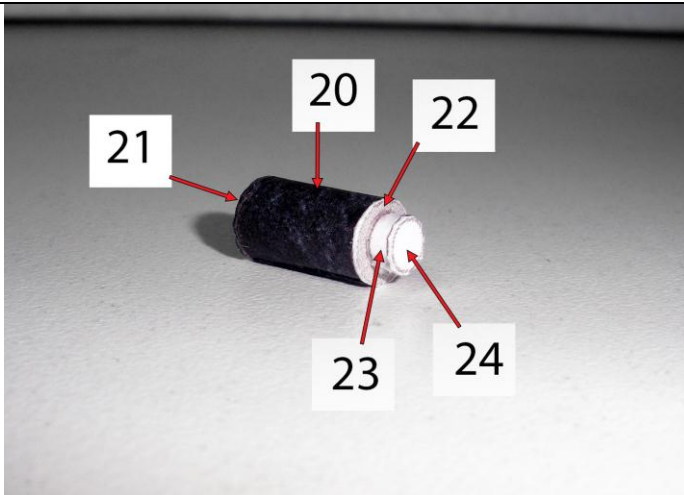

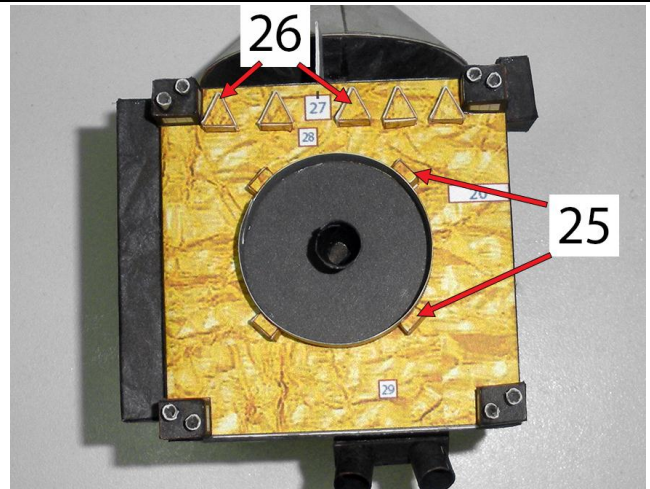

Glue X to the bottom of the HGA.

Glue 16 to the grey line under the HGA

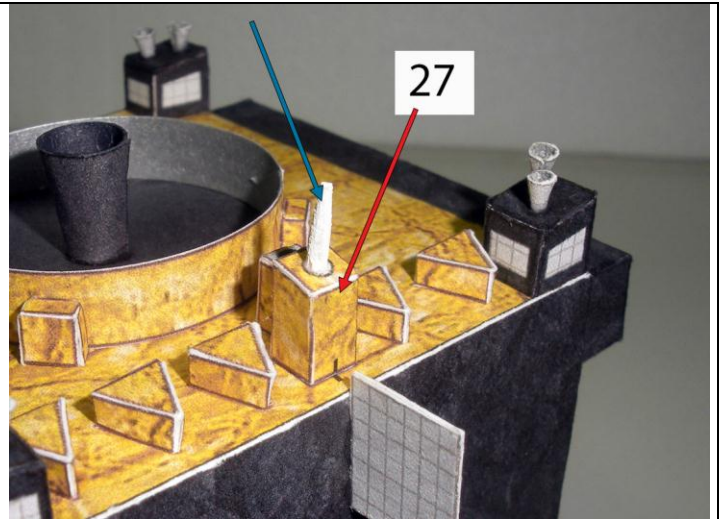

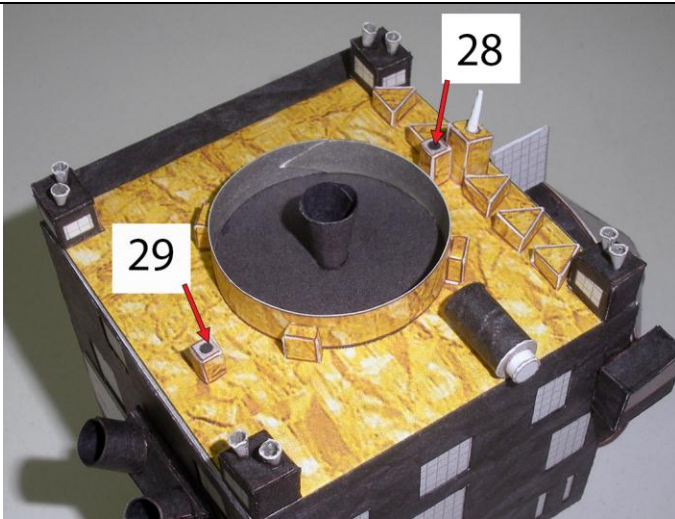

Part 17

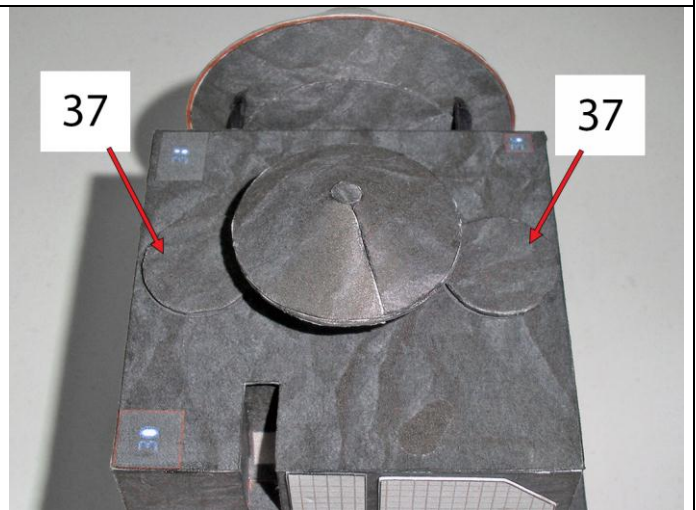

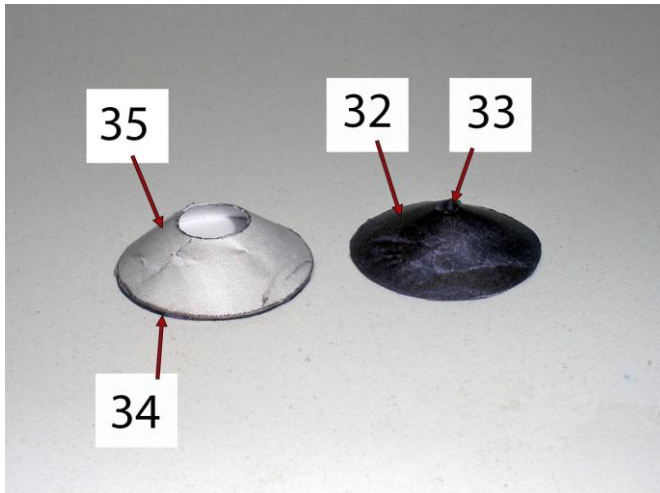

Glue to the areas labled "20" as shown.

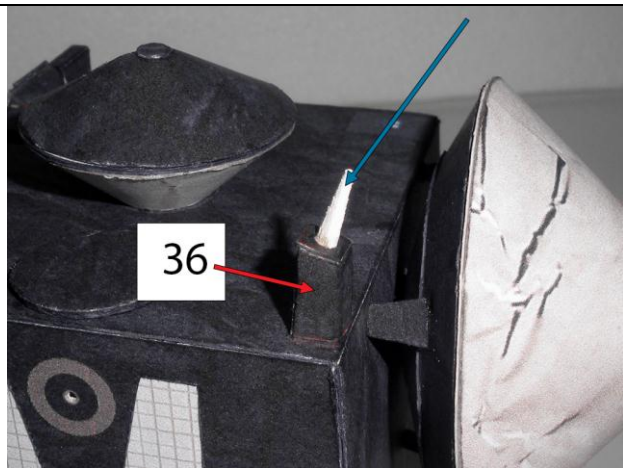

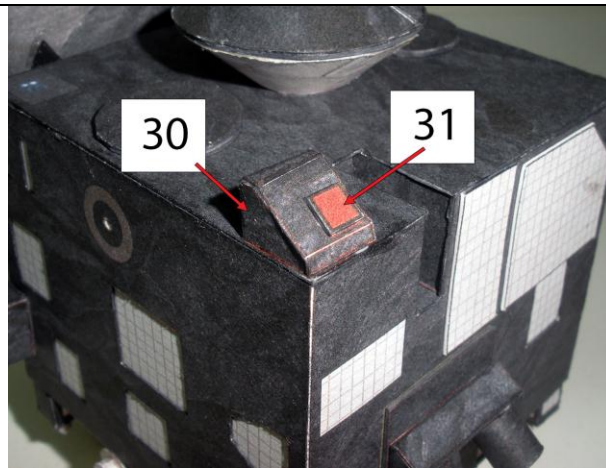

Match to two black lines on 27 and the body.  
Prepare a pointed end of tooth pic according to the instructions on page 3 on the parts file. Glue onto the circle on 27.

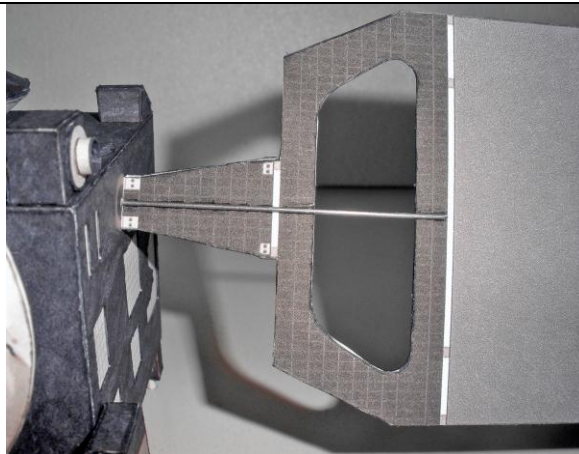

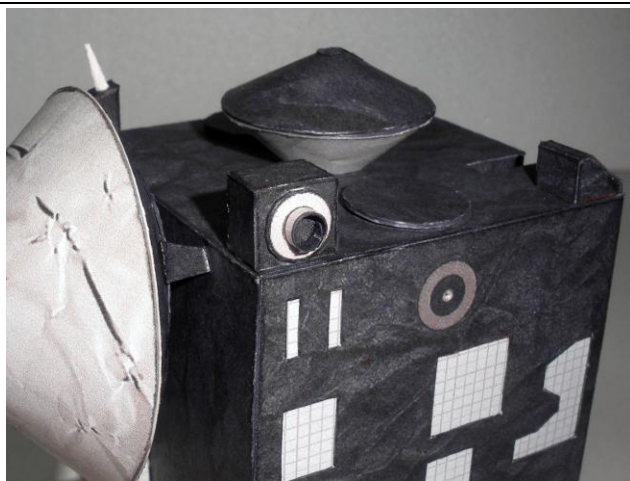

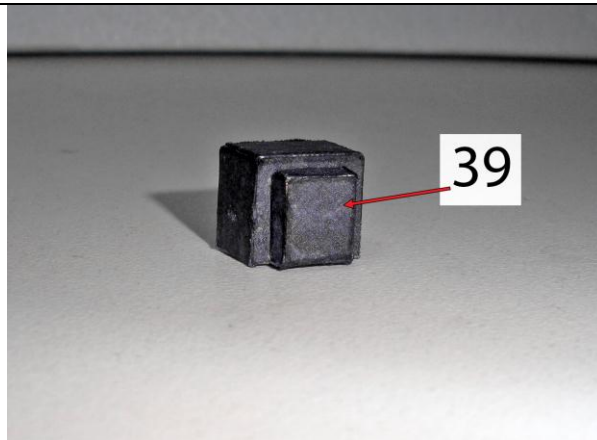

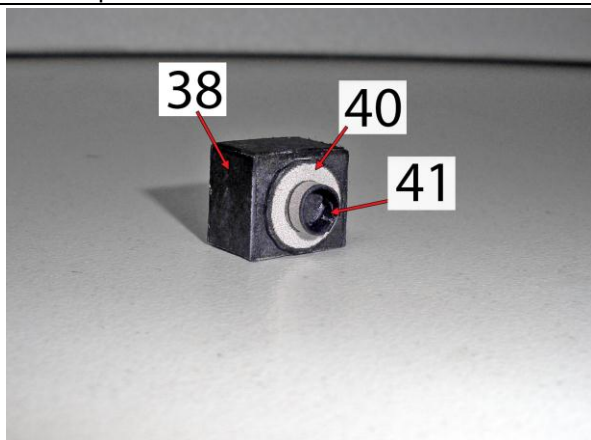

Glue to the top labeled "32-35". Glue 35 as shown.

Glue 36 on the area labeled "36" as shown. Prepare a pointed end of tooth pic according to the instructions on page 3 on the parts file. Glue onto the circle on 36.

Glue to the areas labeled "30".

Glue each solar panel back-to-back. Prepare the solar panel support rod according to instructions of page 4 on the parts file.

Insert into one side of the body and out the other side. Glue to backside of one solar panel to one end of the support rod as shown. Do the same for the other solar panel keeping both solar panels in line with each other.

Your model is done.
