

Nike Hercules (MIM-14) Missile 1/40 Scale Paper Model Instructions

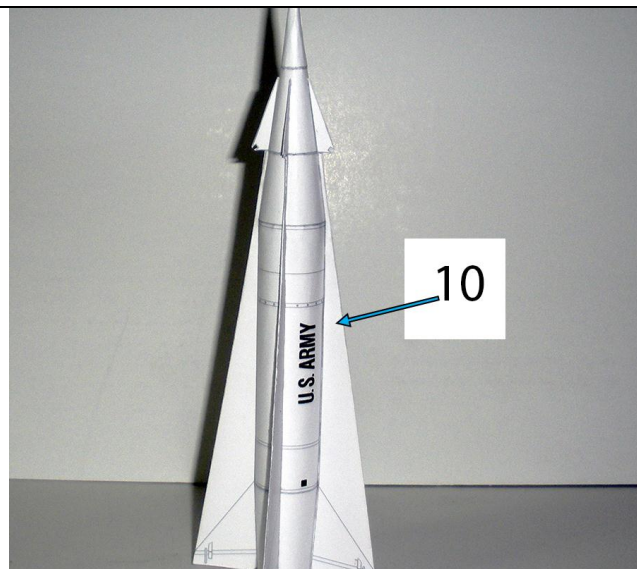

These instructions works for both the Back and White and the Army Green Models along with the models of the missile as deployed in other countries.

NOTE

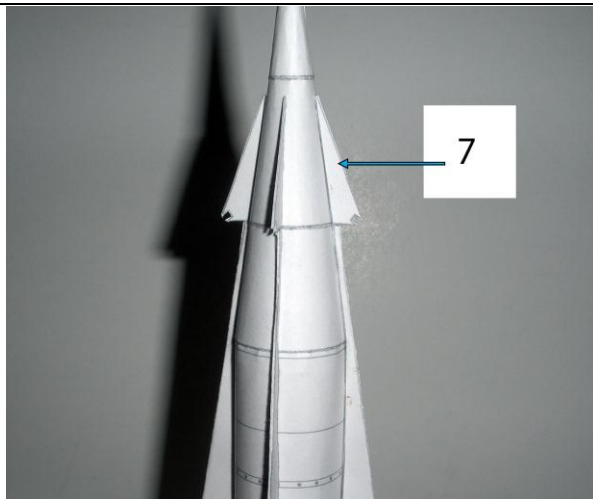

This model requires several matching markers on various parts to the seems on other parts. This is important for proper parts alignment, orientation and proper construction of the model.

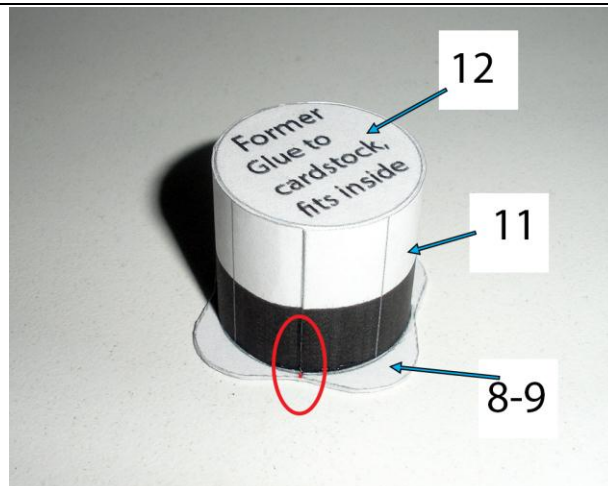

Keep all seems aligned, small black square is at the bottom of the tube as shown above.

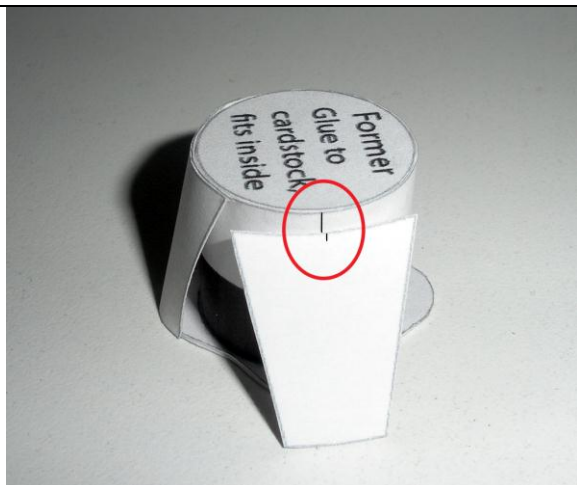

Glue the fins onto the grey lines, top of the fins reaches the top of the first conic, see next photo.

Glue the small fins (**parts 7**)
The top half is done

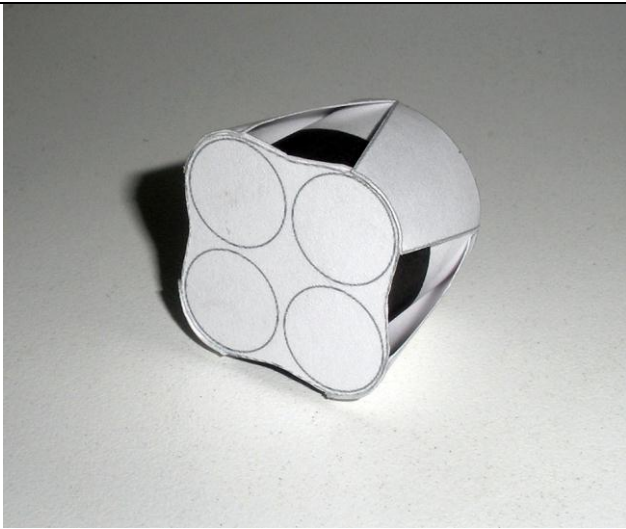

Glue parts **8 and 9** back-to-back.
Glue the former (**12**) inside **11** at the top edge (white end).
Glue **11** to the large circle on 9 while matching the seem to the red marker on part 9. Black end is at the bottom as shown.

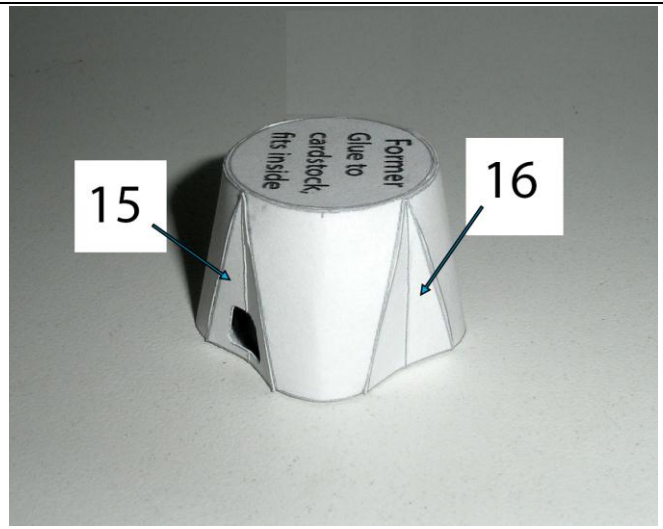

Curve parts **17** around a $\frac{1}{2}$ inch rod.
Glue 17 starting at the top edge, match the marker on 17 to the line on 11 as shown (red circle), then glue the bottom.

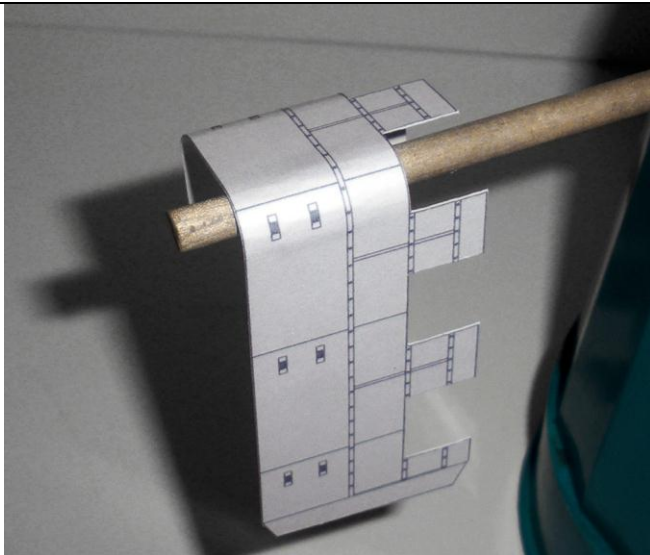

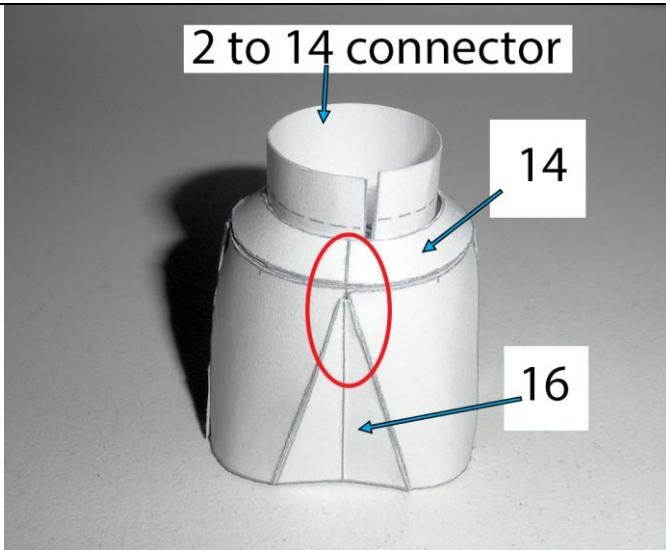

Should look like this.

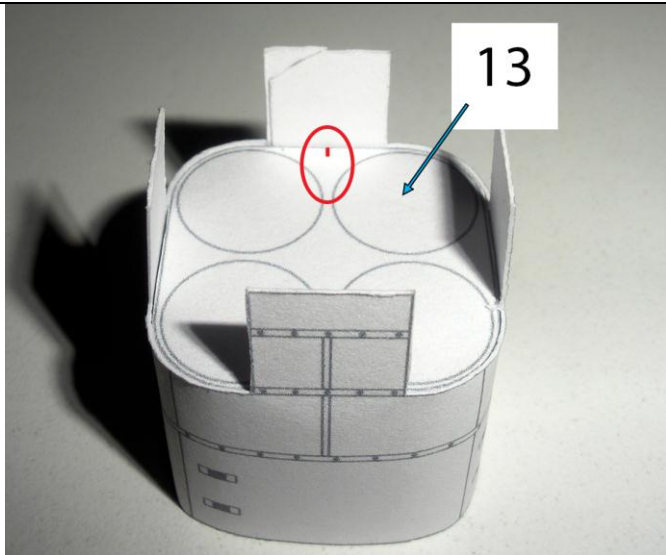

Bottom view showing part 8

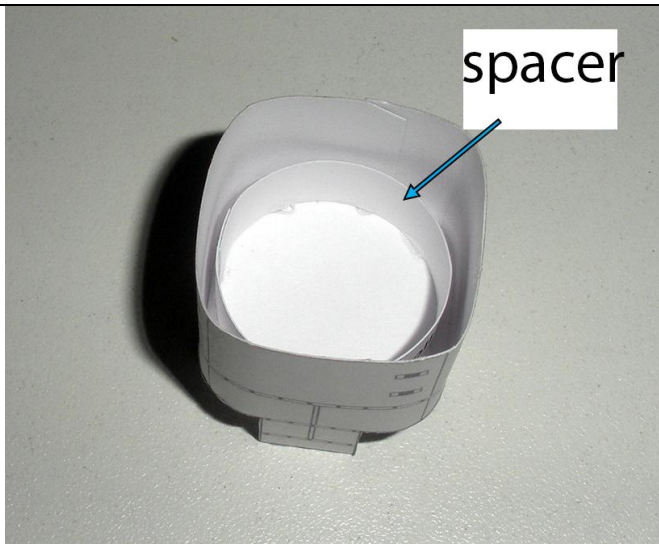

Cut out the black areas from **15**.
Valley fold **15** and **16**, glue as shown.

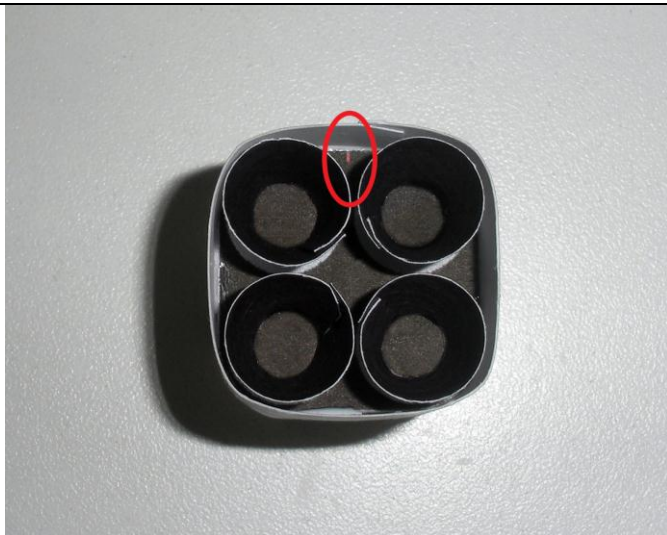

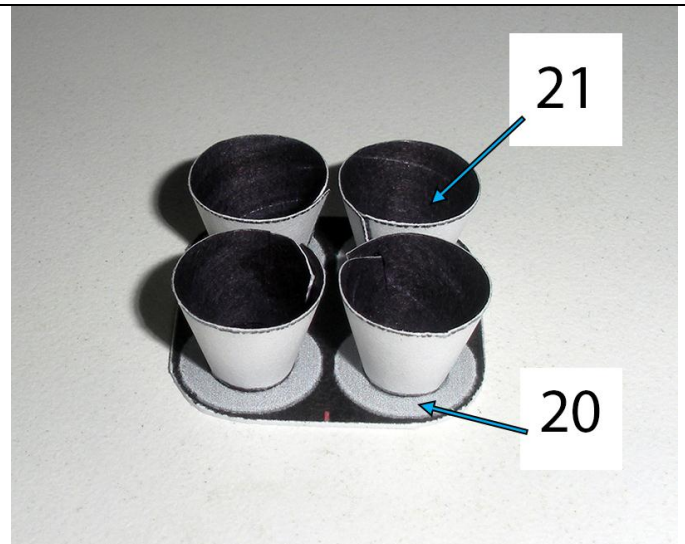

Curve the four corners (at the line) on part **19** around a 5mm diameter rod as shown.

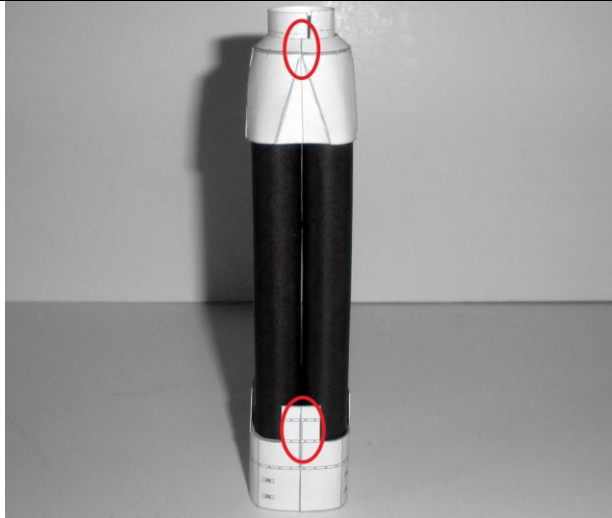

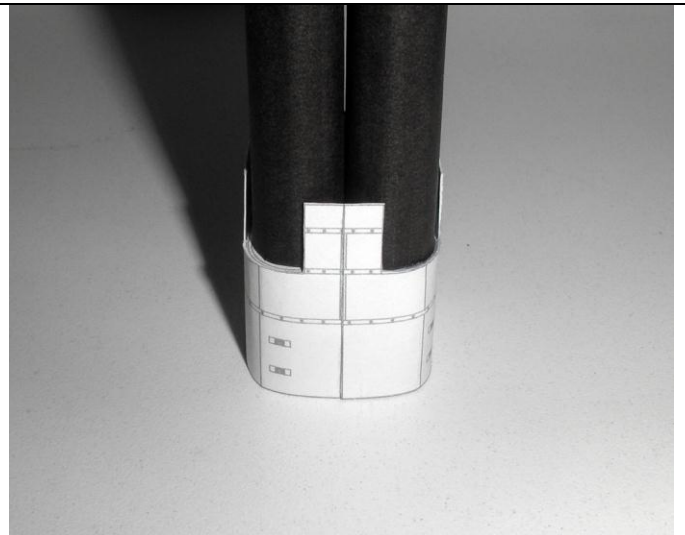

Glue **13** to cardstock, glue inside at the top edge while matching red marker with the seam on the outside of **19**.

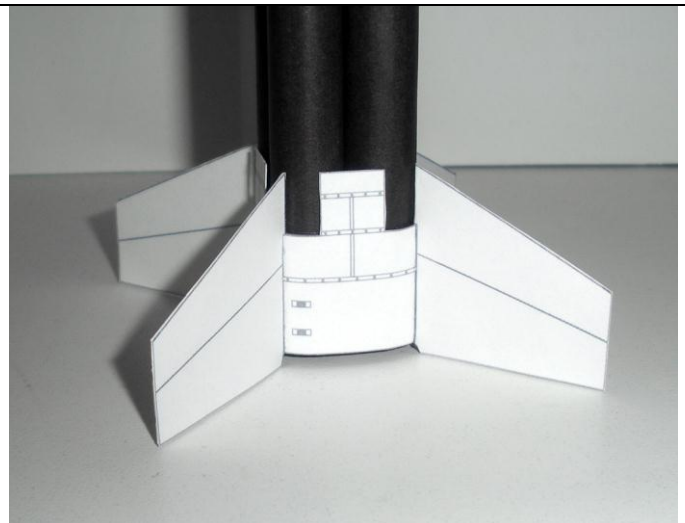

Glue the spacer inside.

Match the red marker to the seam on the outside of 19.

Match the seams shown into the red circles.

Fins (Parts 22). Bottom half is done

Glue the top half to the bottom half while matching the “U.S. Army” print to the side with the black cutouts as shown in the red circles.

Your model is done.

For models of the missile deployed in other countries, match the markings or the country’s flag or symbol on the upper half to the side with the black cutouts on the lower half as shown in the red circle.
