

Sprite-Sat (RISING)
1/10 Scale Paper Model Instructions

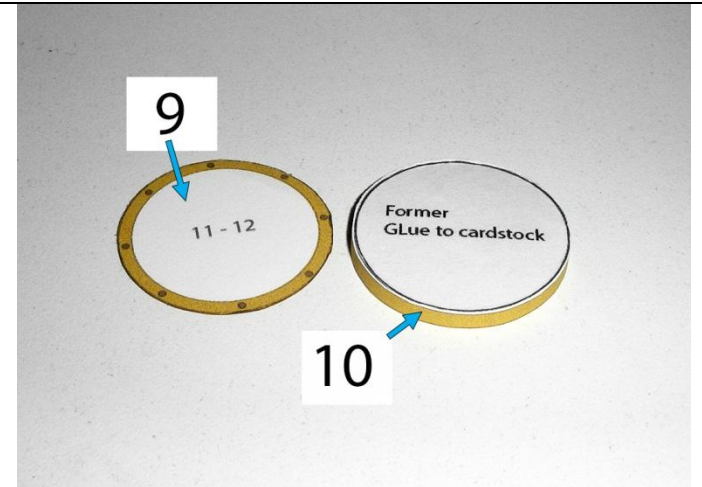

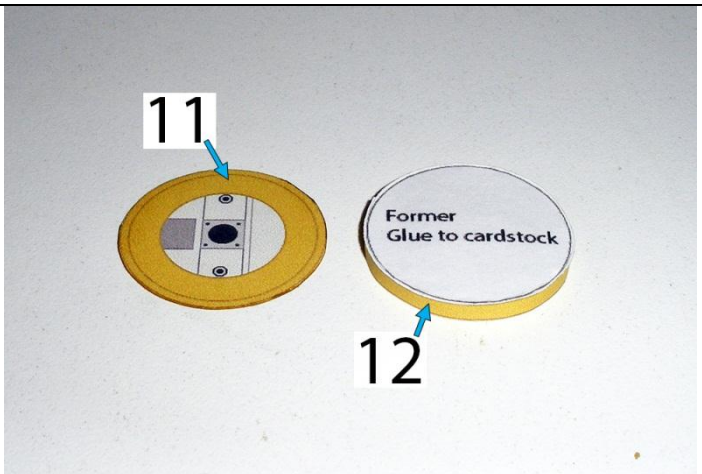

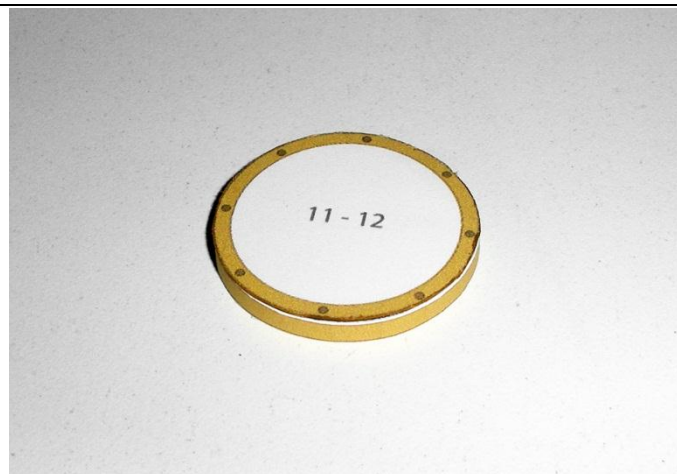

Poke hole on the black dot on the top, this will help hole the mast in place.

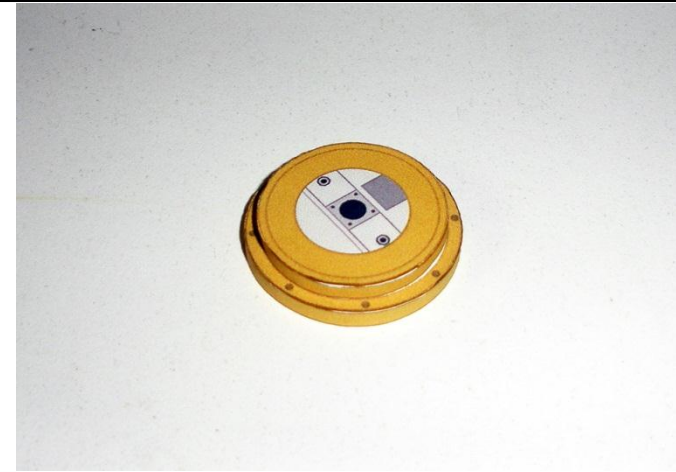

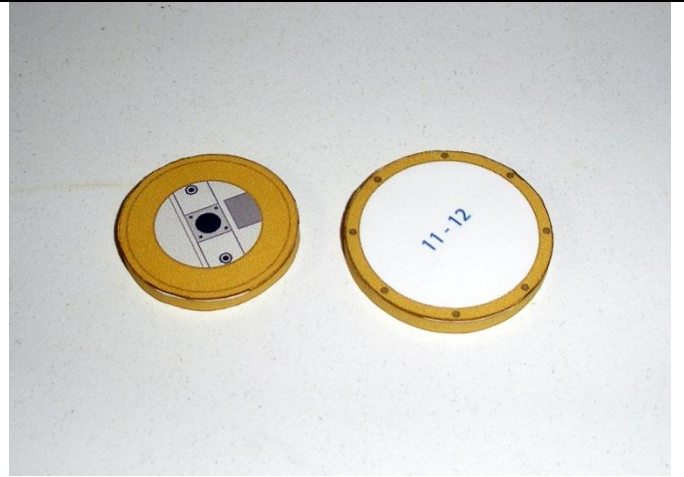

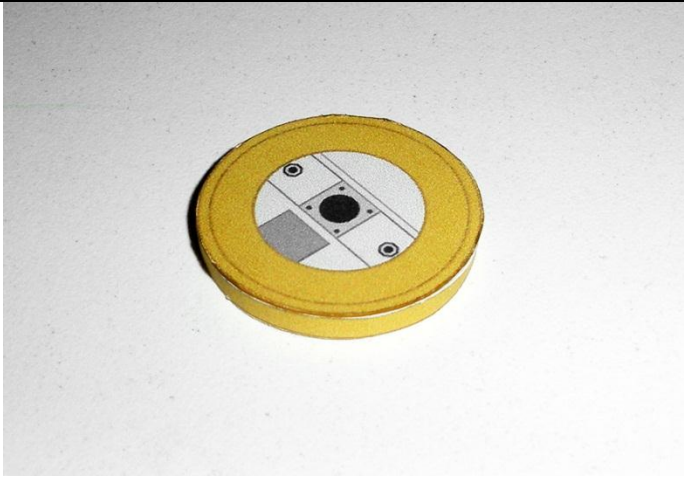

Poke hole on the black dot on 5, glue on the bottom of the drum, this will help hole the mast in place. Set this to the side for a while.

Former fits inside the ring to give it its round shape.

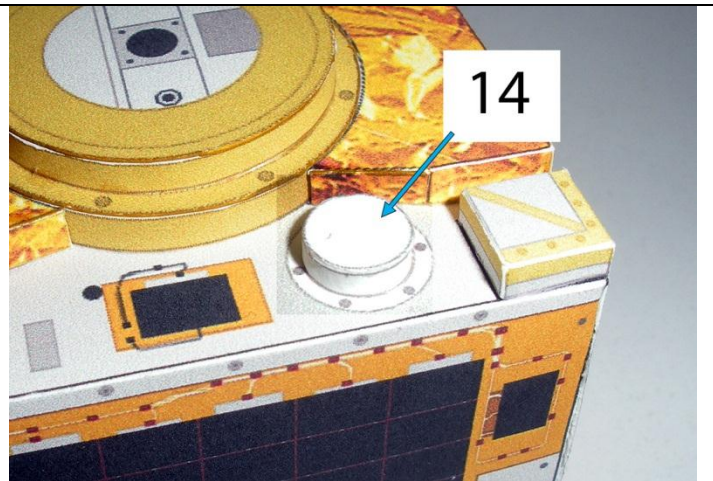

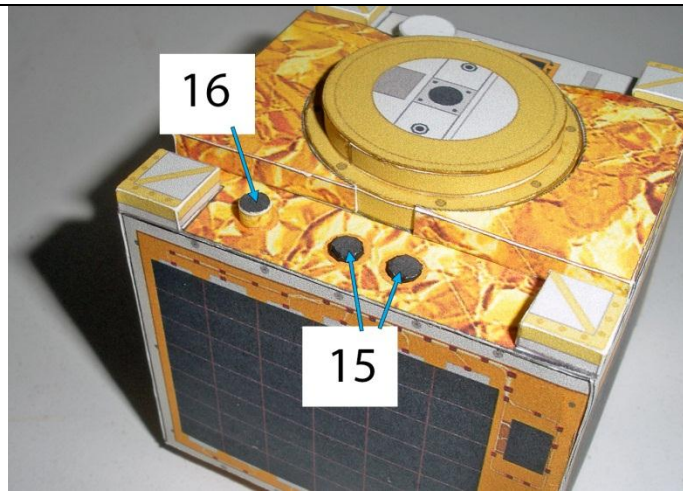

Former fits inside the ring to give it its round shape.

glue together.

Glue to the bottom as shown, note the grey rectangle on 11 is located to the top and the two black circles to the left.

Note the two gold colored edges on each pad (parts 8) faces outwards as shown.

Prepare the mast according to instructions on the parts sheet, glue one end of the mast about 1mm onto the hole at bottom of the drum (parts 3-5) and the other end of the mast about 1mm onto the hole on top of the spacecraft. Make sure everything is straight and let dry.

Your model is done.
