

Symphonie

1/30 Scale Paper Model Instructions

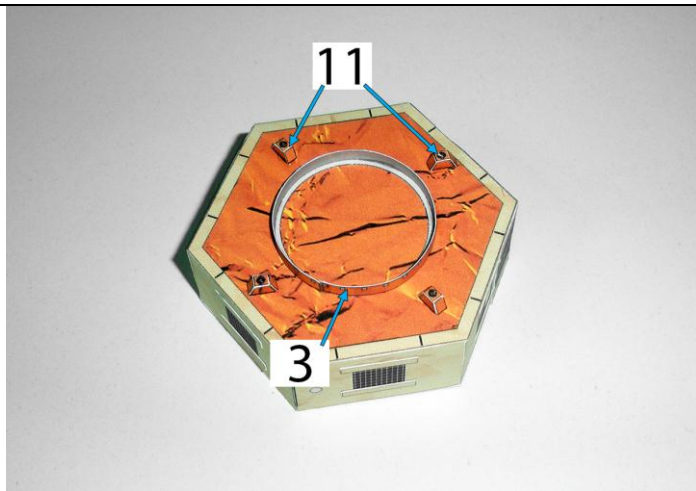

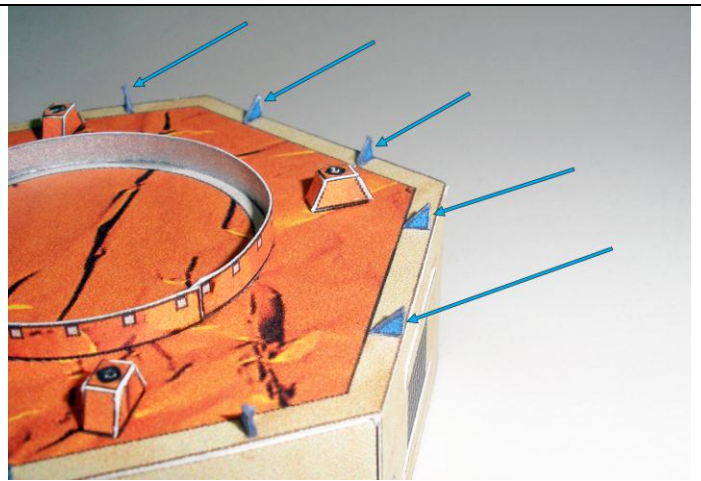

Glue these parts onto their labeled areas as shown.

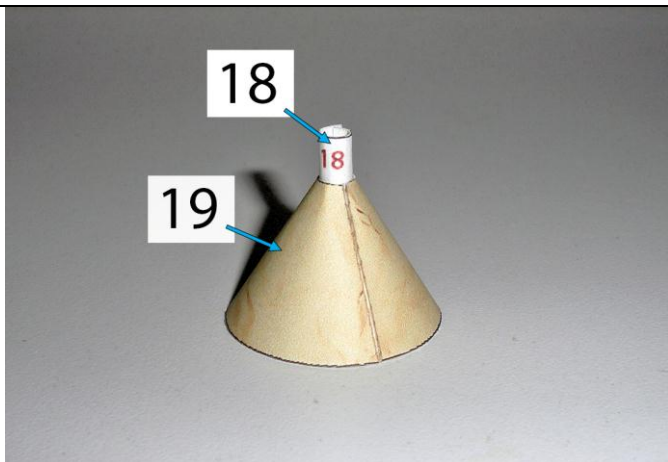

Glue 5 to the back of part 4

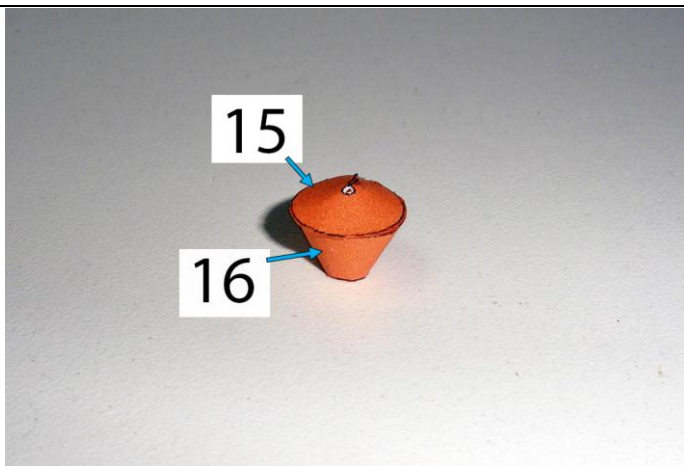

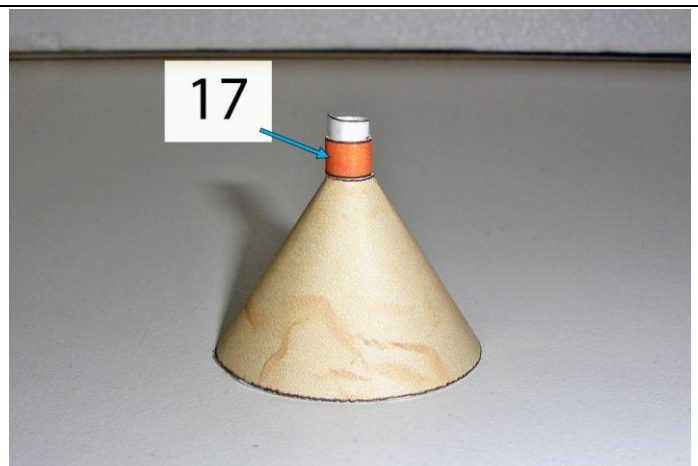

Poke small holes on the black dot on parts 11, glue on the labeled areas on the bottom. Glue 3 on the black circle with the small squares up.

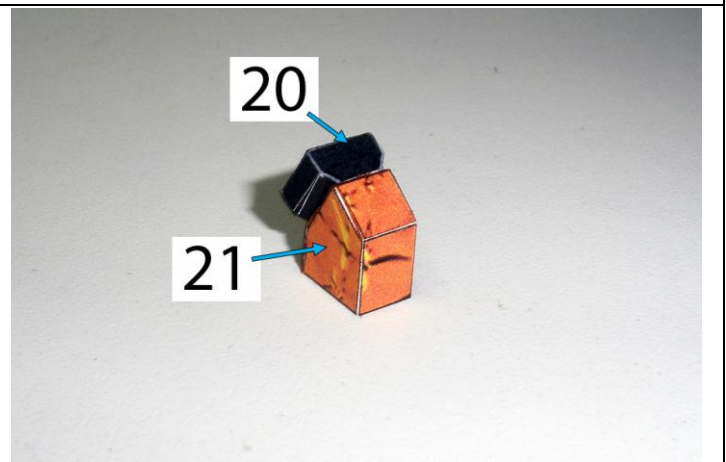

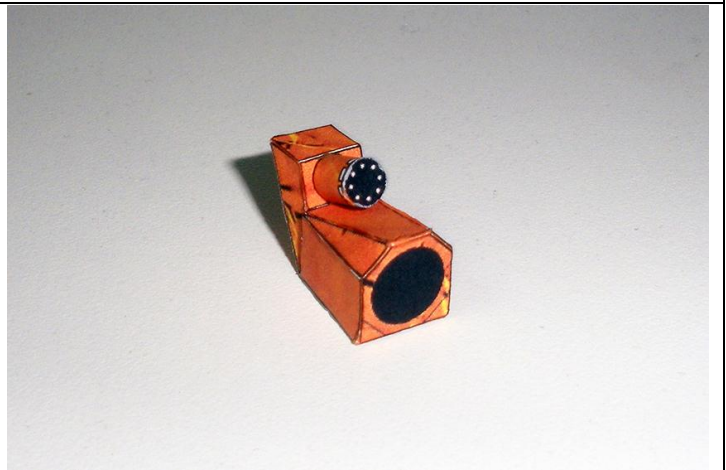

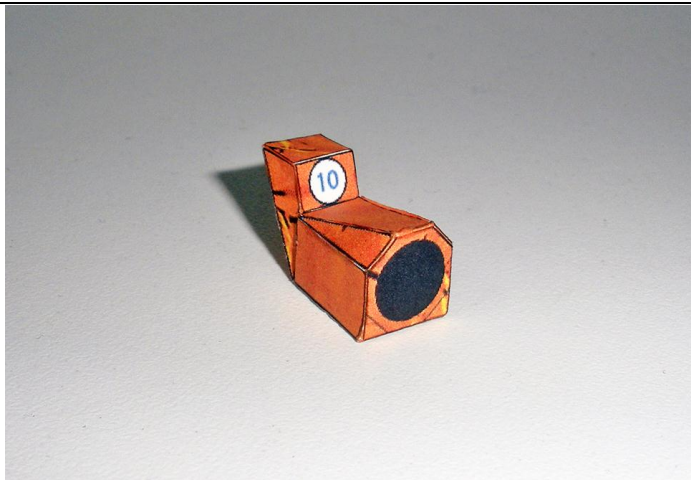

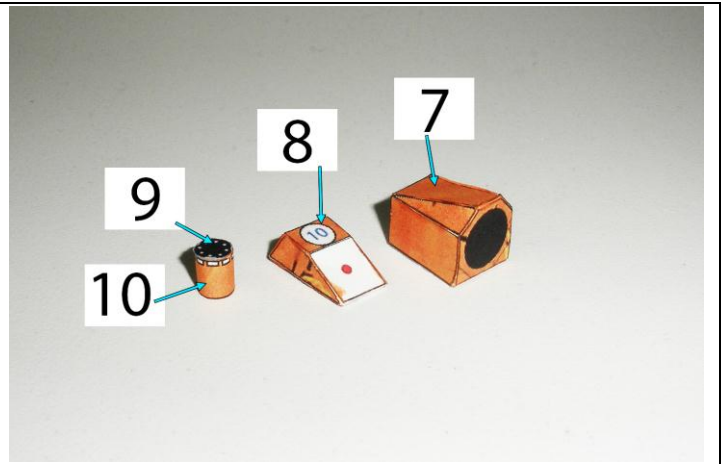

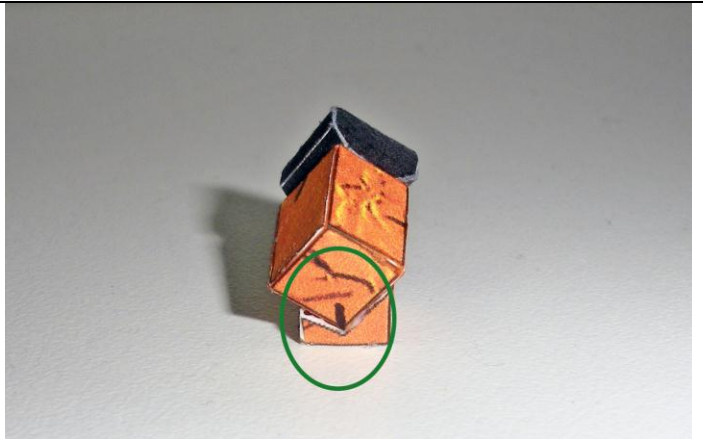

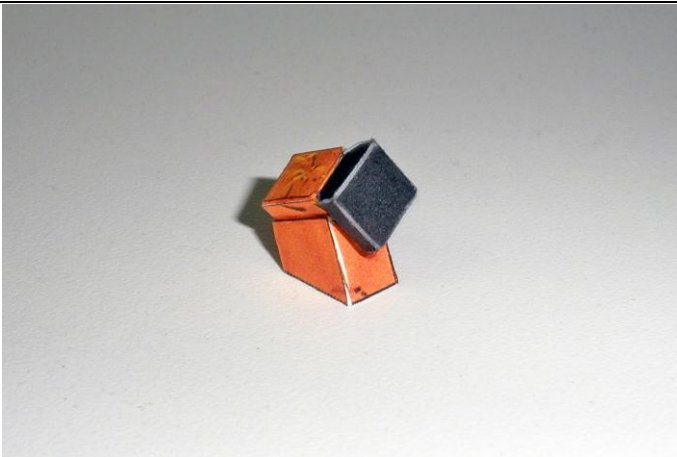

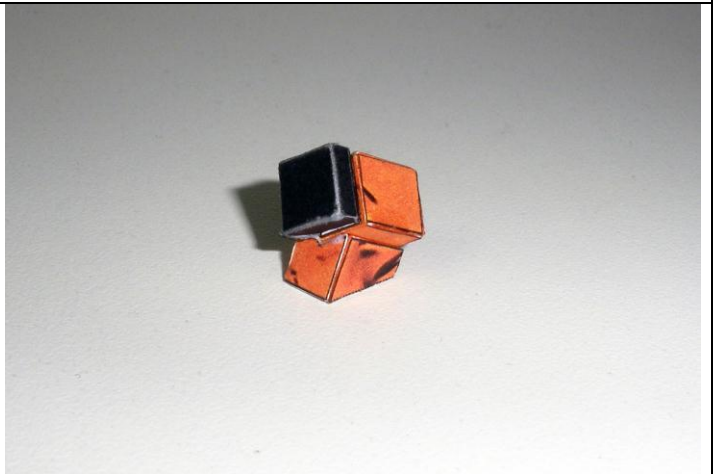

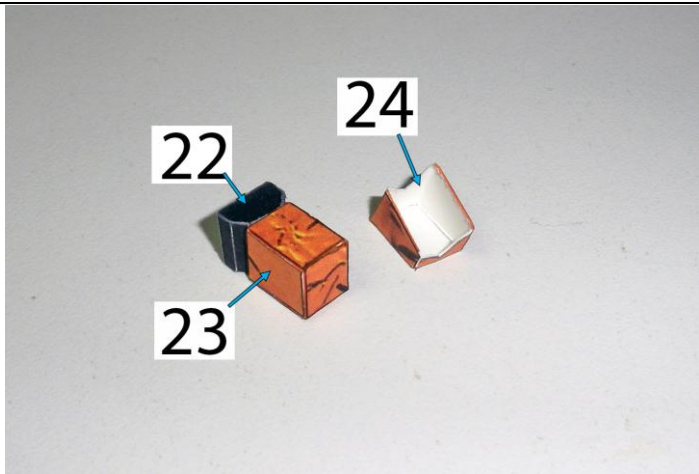

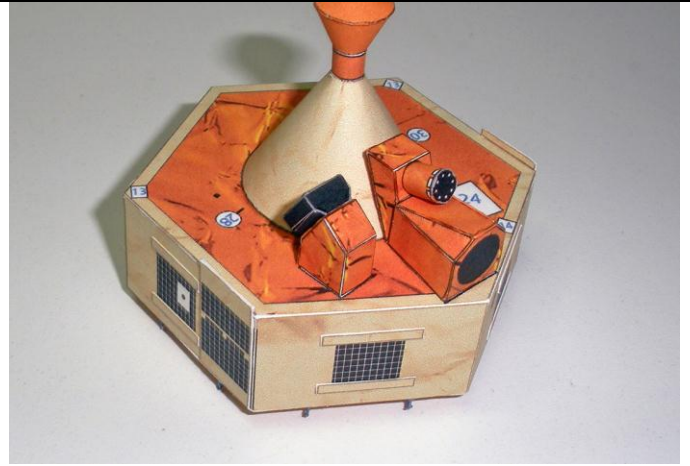

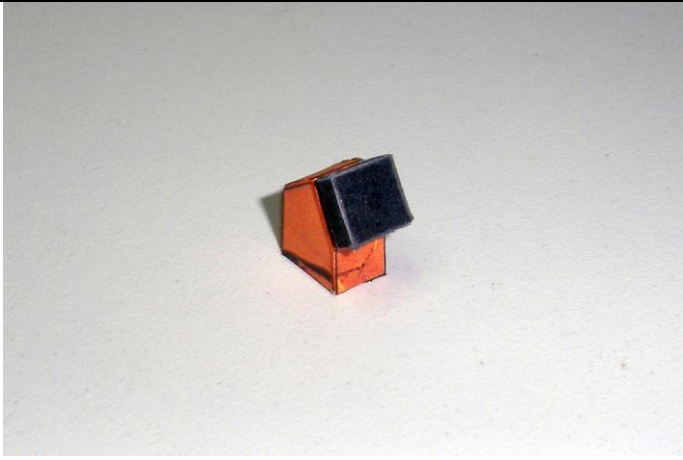

Glue parts 12 on the black lines on the bottom with the long sides facing in as shown.

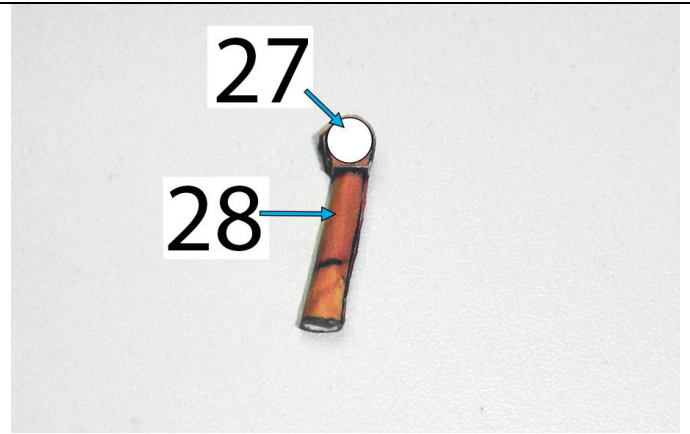

Glue 18 inside the top opening of 19 up to the grey line on 18.

Match the black marker on 23 to the bottom corner as shown.

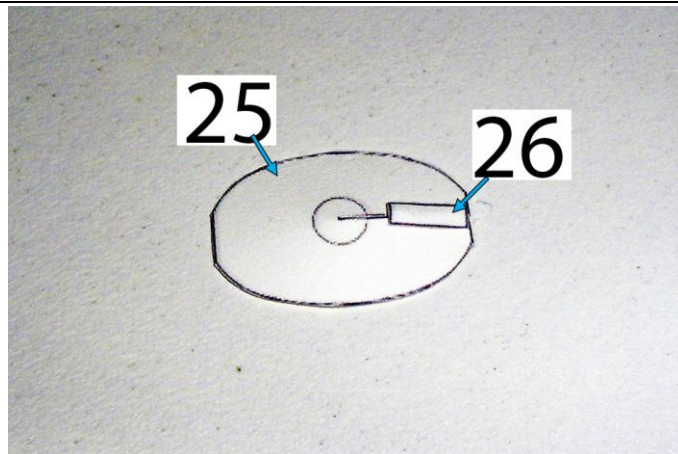

28 is an angled cone.

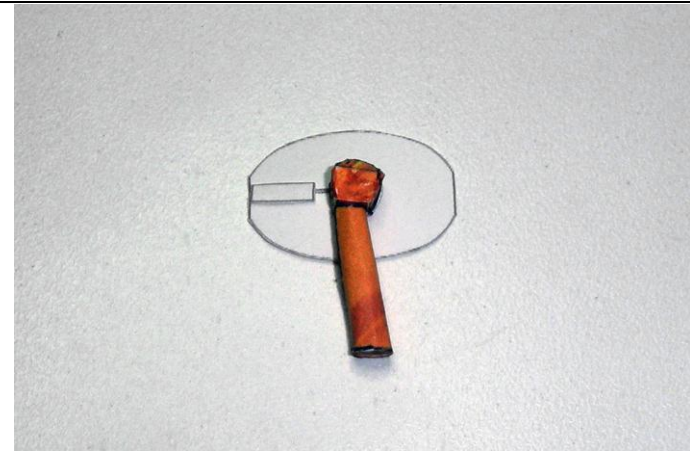

Backside of 27 - 28

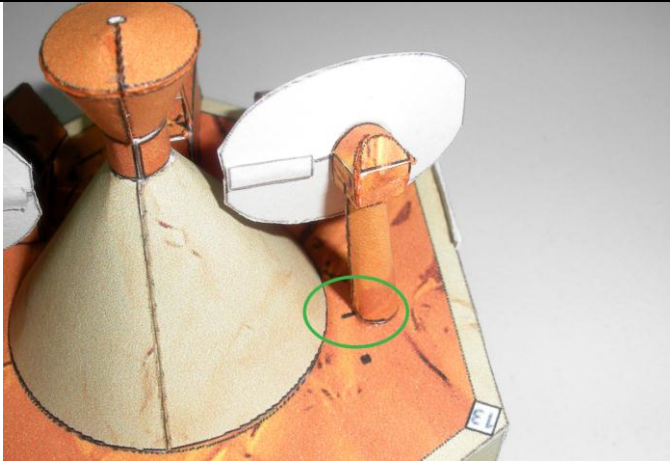

Match black marker on 27 to the seem on 28.

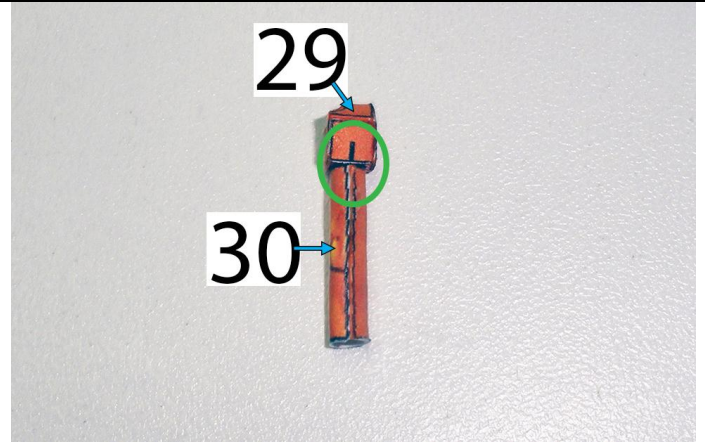

roll 25 to a shallow dish with the graphics outside.
Make two of these.

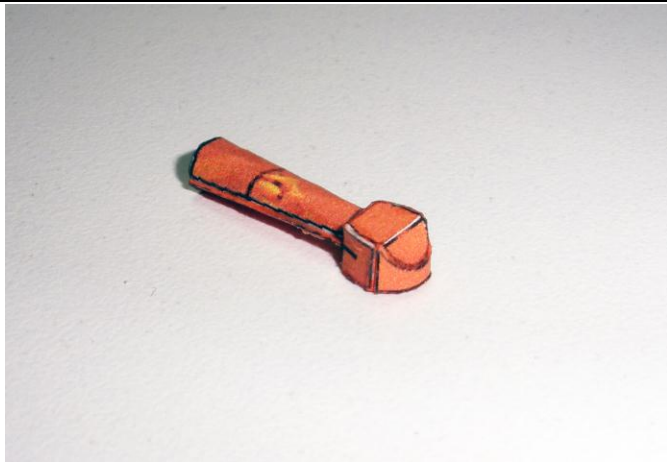

Glue 27 – 28 to the circle on the backside of 25 as shown.

Glue to circle labeled "28", match seem to the marker as shown.

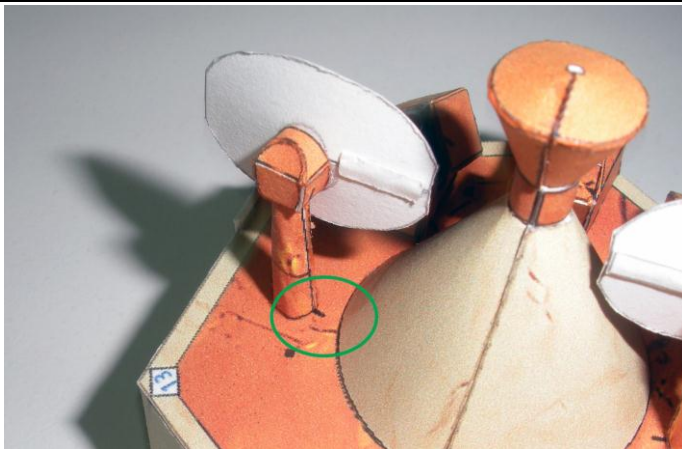

Match marker on 29 to seem on 30. 30 is a straight conic.

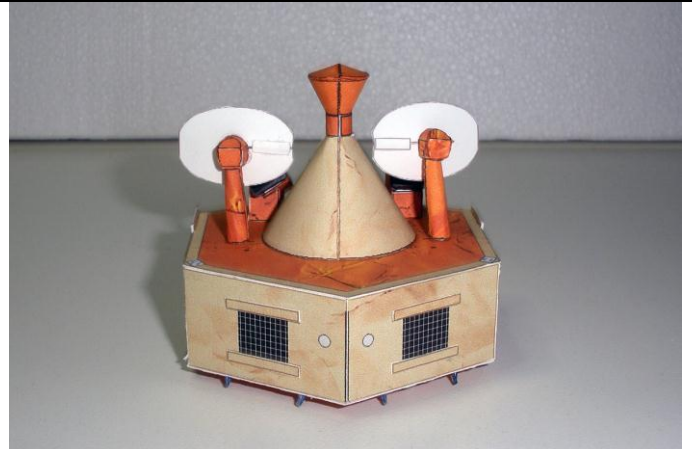

Backside of 29 - 30

Glue to the circle on the backside of 25 as shown.

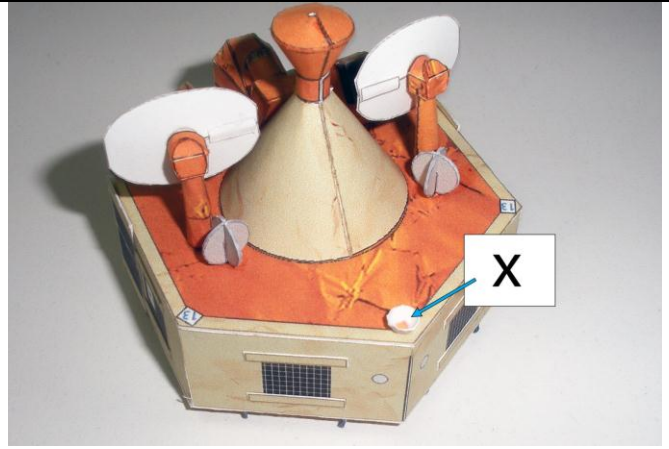

Glue to the circle labeled "30", match seem on 30 to the black marker.

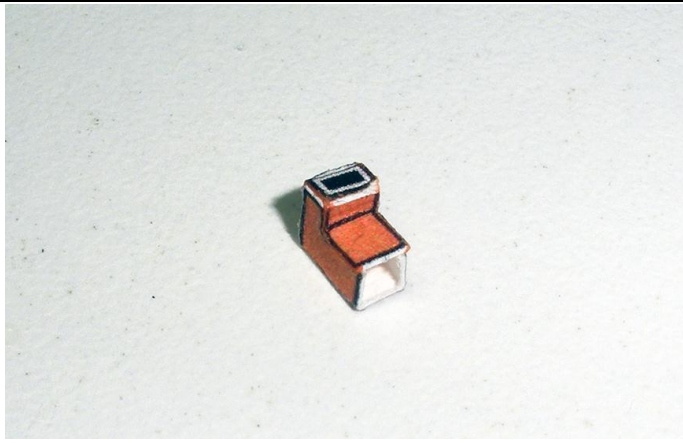

This may look uneven, but this is how the real spacecraft is designed.

Inter-lock parts 31 as shown and glue together, make two of these.

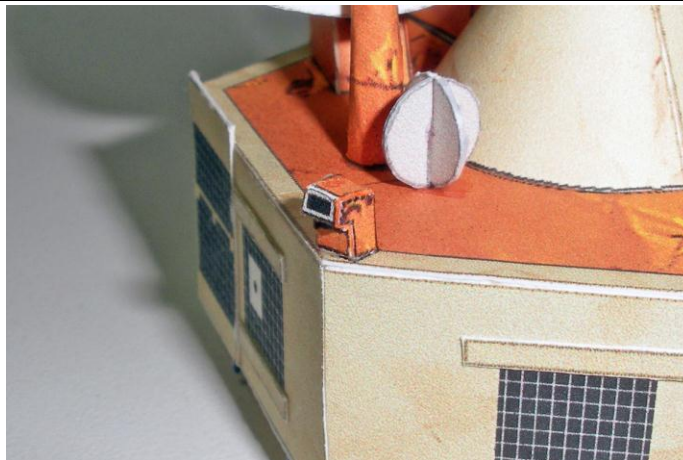

Glue each to a black dot behind the two dishes as shown. Glue X onto the circle as shown.

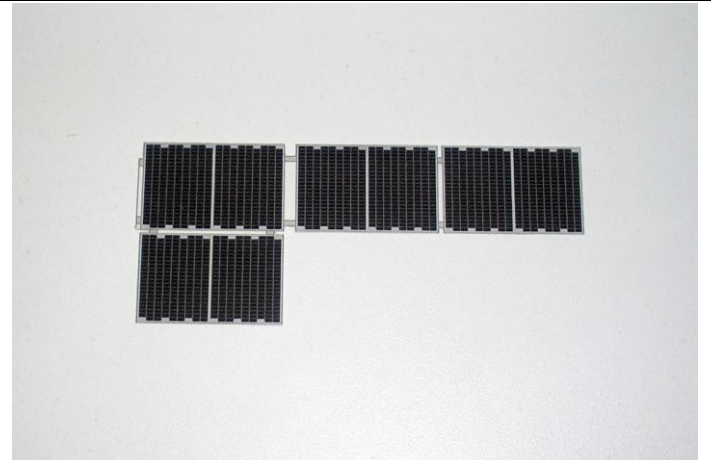

Part 14

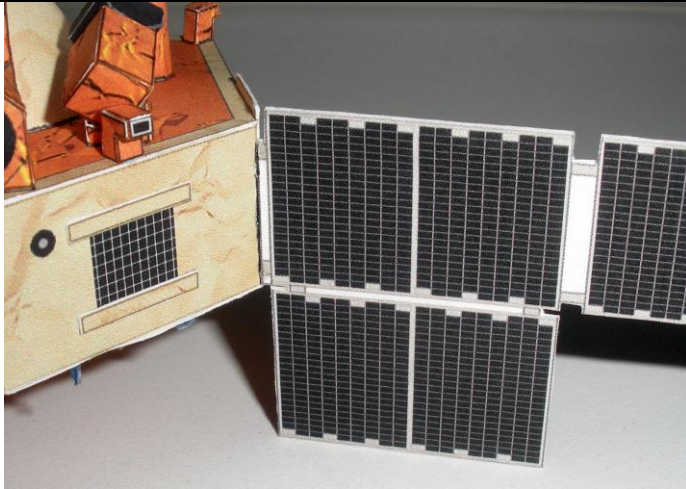

Glue on the labeled area as shown.

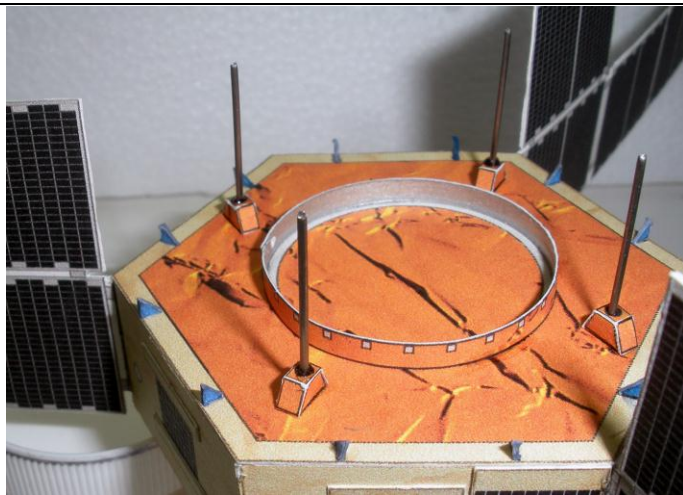

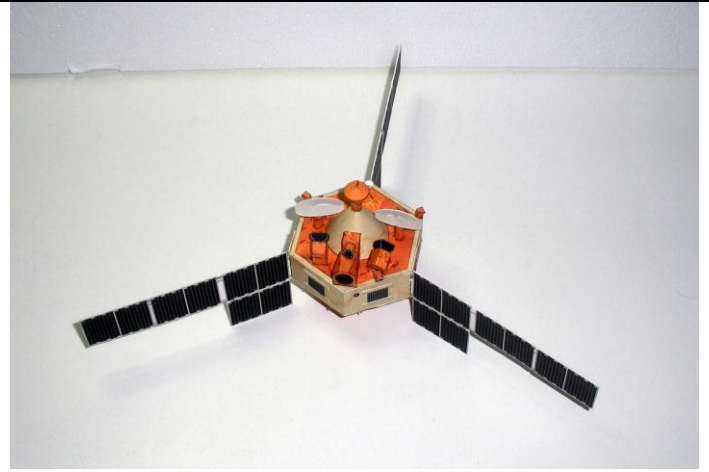

Glue parts 13 to their labeled areas as shown.

Parts 32 – solar arrays. Fold-glue each back-to-back

Glue each onto the black line on the three corners as shown.

Prepare four plastic broom straws or similar material according to instructions on page 2 on the parts file. Very thin music wire was used here.

Insert each into the hole you poked on parts 11 until it stops and glue in place.

Your model is done.
