

Syncom 3

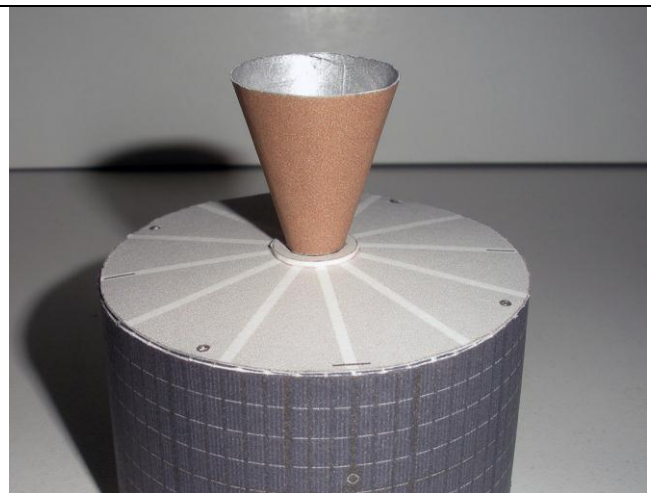

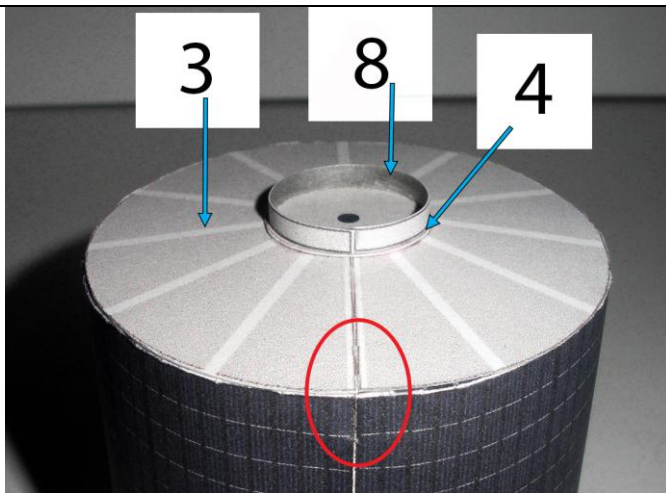

1/12 Scale Paper Model Instructions

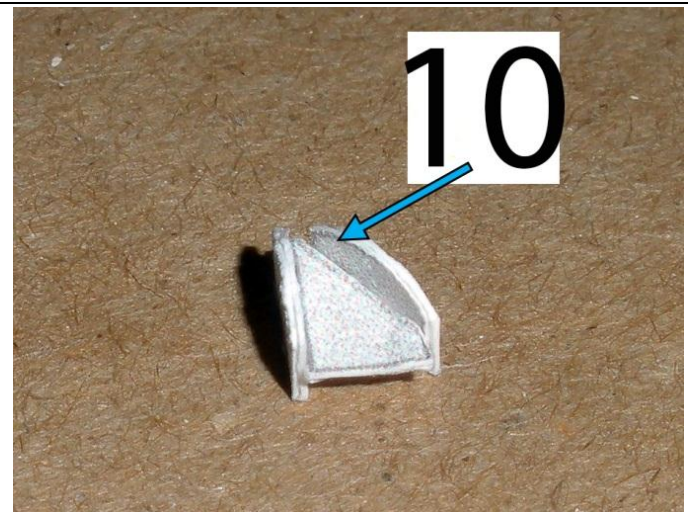

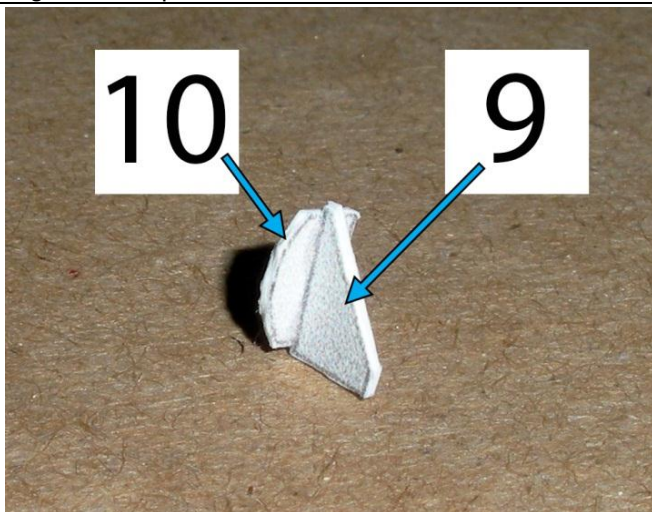

NOTE: Syncoms 2 and 3 are identical satellites.

BOTTOM...
Poke small holes on the black dots on 5, this helps hold the antennas in place. Match seem on 5 to the seem on the body.

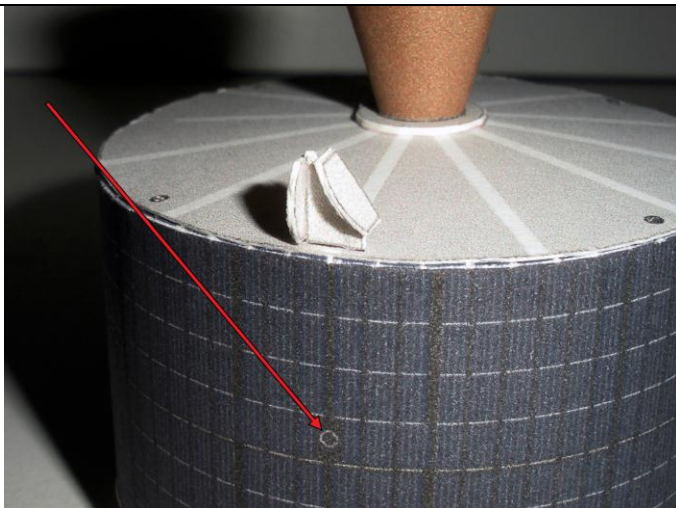

TOP...
Match seem on 3 to the seem on the body.
8 is glued on top of 4.

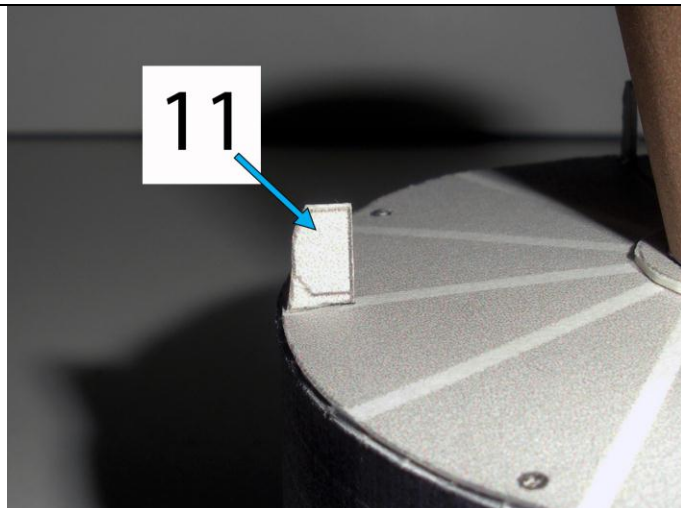

Glue each pairs on parts 9 and 10 back-to-back. Glue 10 to the straight edge of 9 with the curved side towards you as shown..

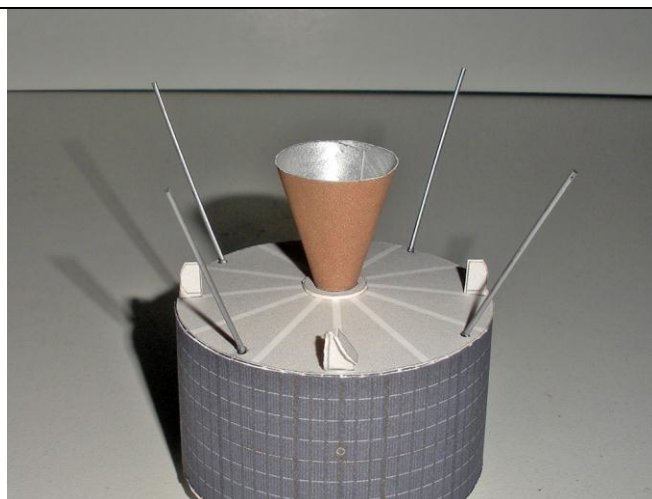

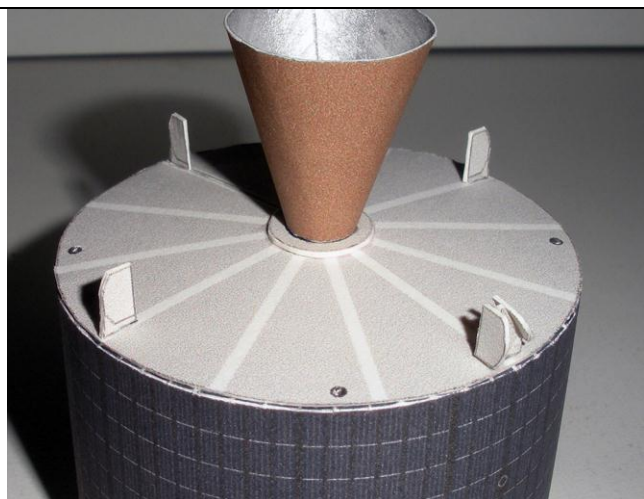

Glue the other part 10 to the angled edge on 9 with the curved side towards you as shown.

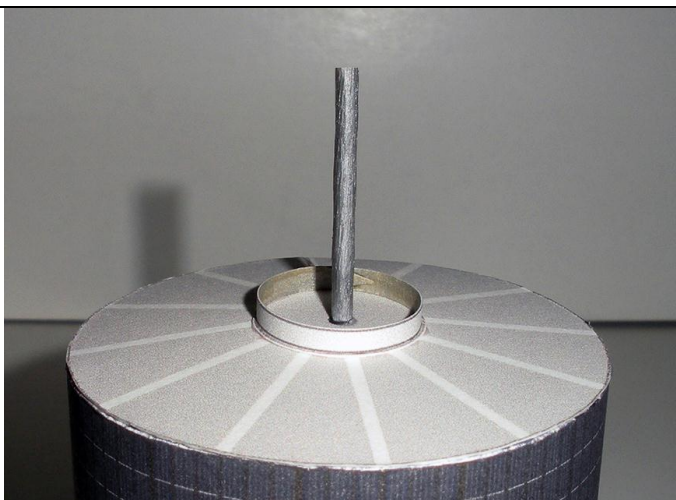

Glue on the line on the bottom as shown, this should be located over the small circle on the body.

Glue the three pairs of parts 11 back-to-back, glue 2 of them to the black lines on the bottom as shown, the third is glued onto the seam close to the edge – see next photo.

Prepare the four antennas according to the instructions on the parts file. Glue each to a black dot on the bottom as shown.

Prepare tooth pic or similar material according to the instructions on the parts file. Glue on the TOP as shown.

Your model is done.
