

UniSat-5

1/8 Scale Paper Model Instructions

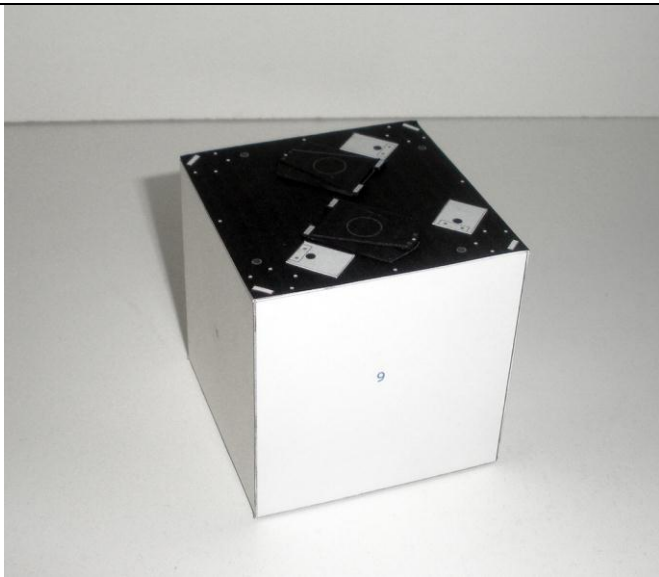

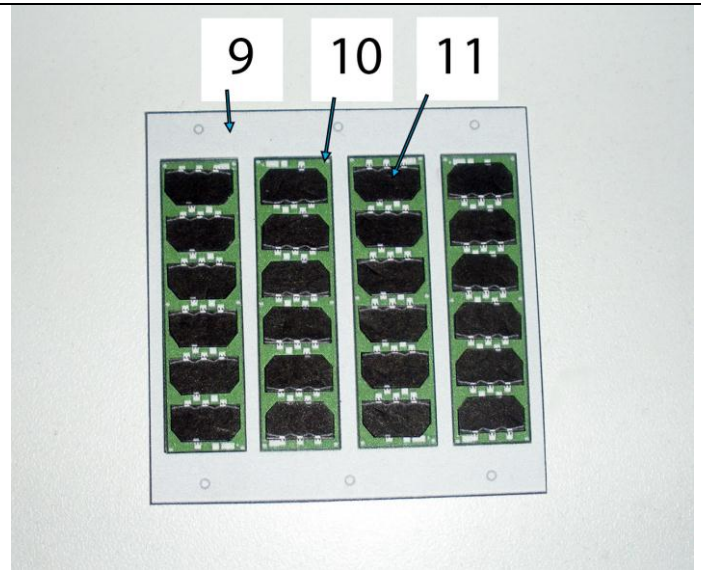

Glue these to the bottom of part 1.

Glue these to the top of part 1. 7 is glued on top of part 6.

Fold part 1 into a box.

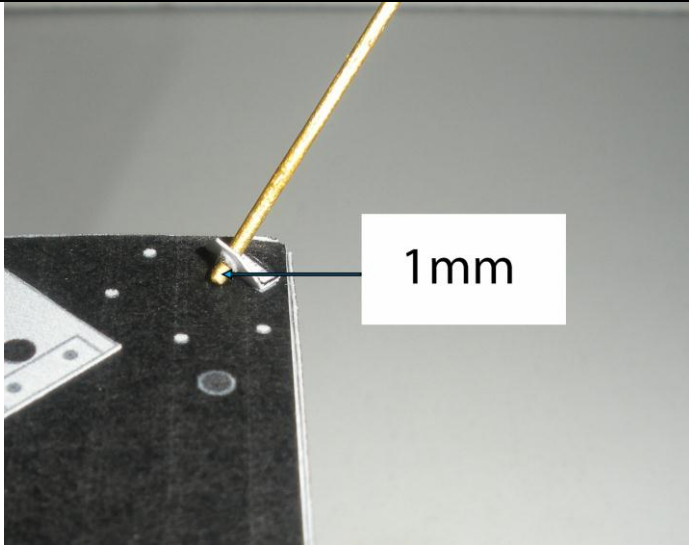

Note the orientation of each column of solar cells – down, up, down and up.

Glue the 4 panels to the body as shown.

Poke a small hole into the dots on part 5.
Glue each to the rectangle on each corner on top.

Slide one end of the antenna into the hole on part 5 until around 1mm extend out the back as shown.

Glue this end onto the top of the body to hold in place.

Do this to the other three antennas.

Your model is done.

Prepare the four antennas according to the instructions on the parts file.
