

Vanguard 2

1/10 Scale Papermodel Instructions

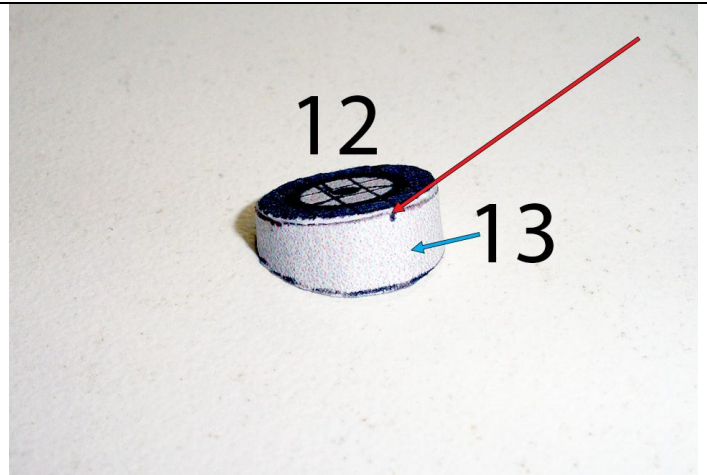

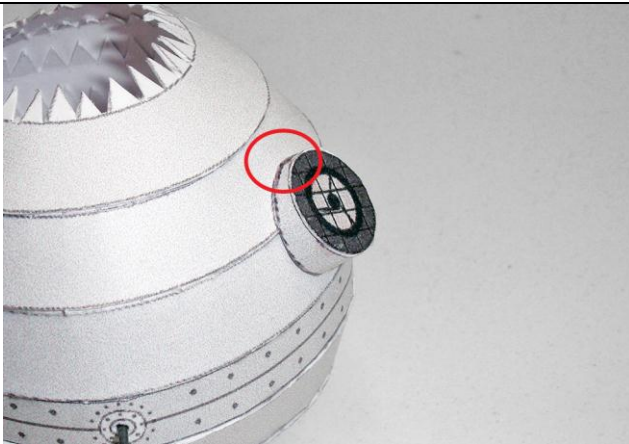

Match all seems together.

Poke small pin holes onto the four black dots on Part 6 for the antennas

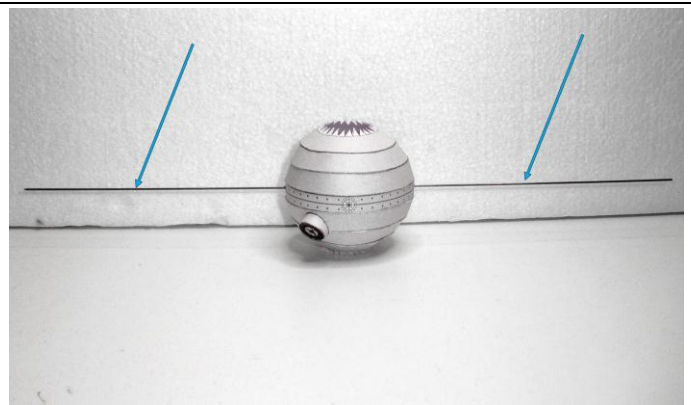

Very Important: Do Not glue parts 1 – 2 (top) and 7 – 8 (bottom) onto the model yet.

Glue 12 onto the top (with the black marker – red arrow)
Make two of these.

Glue onto the two half circles as shown, match the seem on 13 with the marker on the half circle.

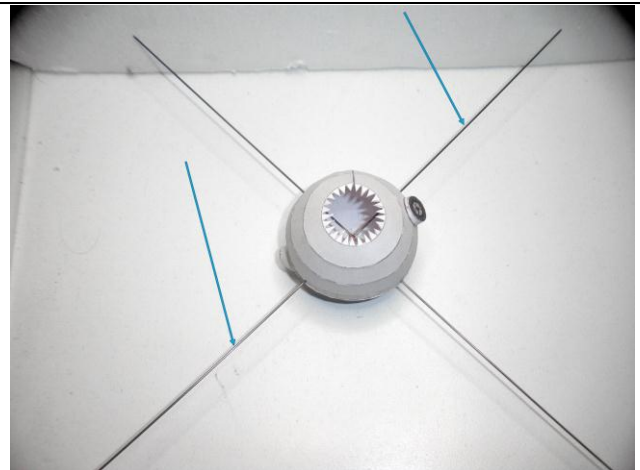

Next steps are important...

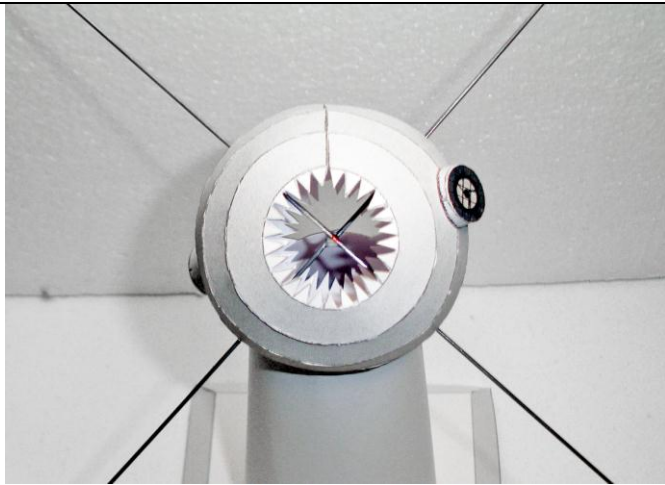

Cut out a 10-inch long music wire or stiff wire around 1 mm diameter according to instructions on page 3 on the parts file. Slide into one hole and out the other as shown.

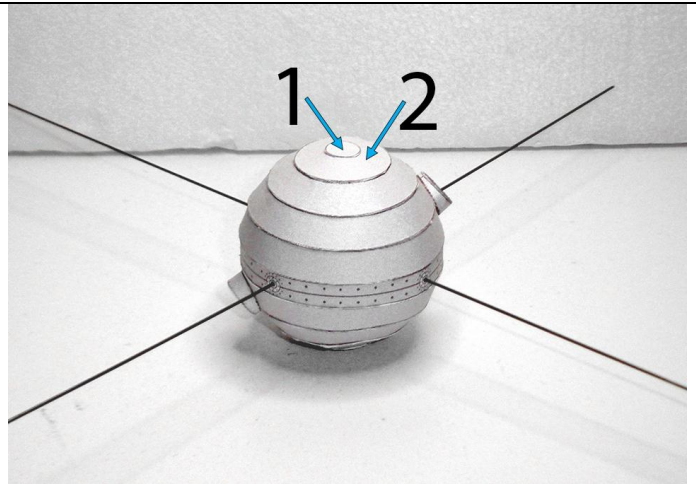

Make sure that each part of the antennas extends out of the model the same length (around 4 inches) and that the marker on the middle of the wire is at the center inside as shown (red circle) and glue in place.

Slide two 5-inch antennas into the other two holes.

Glue the ends onto the marker inside as shown.

Glue Parts 1 – 2 onto the top and Parts 7 – 8 onto the bottom.

Your model is done.
