

Yutu-1 (Jade Rabbit-1) rover
1/15 Scale Paper Model Instructions

9 and 9a are glued on both sides of **1**

Glue **2** and **3** back-to-back, match the red markers

4b is glued inside the rectangle (**4a**)

Glue **1** to the bottom (**3**), match the red markers

Glue **4a** - **4b** to the top platform, note the orientation compared with the markings on the top platform.

Glue to the labeled areas as shown

Poke small holes in **parts 26** before assembly.
Glue the together as shown, one for the left side and one for the right side.

Glue to the labled areas on the bottom side of the platform as shown. Holes pointed towards to back.

Glue to the labeled area on the back of the body.

Make two of these.

14 is wrapped around the top of 15.

Glue to the labeled areas as shown

Glue **part 8** to the labeled area as shown

Roll 43 to a shallow cone with the print outside.

Glue 45 inside of 43. Glue 44 to the back of the dish as shown.

54a is glued inside of 54.

50 is wrapped around **47**.

47 and **50** are glue to the top of **48**.

Glue the dish on top as shown.

Glue **51** back-to-back. Cut out the blue rectangle from **49** before rolling to a tube.

Glue **51** onto the opening with the labeled circle to the top as shown.

Glue the bottom mast of the dish to the circle on **51** as shown.

Prepare toothpic according to the instructions on [page 5](#) on the [parts file](#) and assemble this with **53** on the dish as shown.

Glue **55** to the bracket on top of the dish as shown.

Roll 58 – 59 to small cylinders. Glue 67-68 to the matching graphics as shown

Part 66, curve the area as shown (blue arrow).

Glue the camera assembly to the top of the dish as shown. Glue 66 with the curve area around the mast as shown.

Need to adjust the length of the bottom of part 66 to fit inside the top area.

Prepare the wheel brackets (21a-21b) according to the instructions on page 3 of the parts file.
The long part of the wheel brackets faces the front of the rover. The small white circles faces the outside.

39-40 are glued back-to-back, match the spokes together.
38 is glued inside of 37. 41 is glued to the black circle on 40.
42 is glued to the white circle on 39.

Glue to the rover, parts 42 at the outside.

Important:

Part 64 (solar panel)... Cut out the blue rectangle from 64 before folding. Mountain fold at the blue lines, valley fold at the red lines – should look like this.

Glue to the right side of the rover. The large glue tab matches the inside of the box on top.
Glue to smaller grey glue tab to the outside top of the rover.

Glue **69** into the open area at the bottom of the solar panel (64) to hold it in place.

Although not part of the rover, glue **70** to the bottom as shown, this will hold the solar panel up.

Glue **63** to the small circles as shown.

Prepare two plastic broom straw parts according to the instructions on page 5 on the parts file. Glue to the small circles on the other solar panel (parts **65**) as shown.

Glue the other solar panel to the rover using the large printed glue tab that matches the inside of the box.

Glue **70** to the bottom as shown to support the solar panel.

Prepare two long plastic broom straws according to the instructions on page 5 on the parts file. Glue into the holes on **part 26** as shown.

Should have a slight upward angle

Glue **29** at almost any angle you want compared to the straight edge of **27** (double blue arrow) which will be glued to the body of the rover.

Glue this to the marked area onto the front of the rover.

glue 33, 35 and 36 back-to-back

Glue 32 back-to-back, glue this at any angle you want.

Your model is done.
