

iCube-1

1/2 Scale Paper Model Instructions

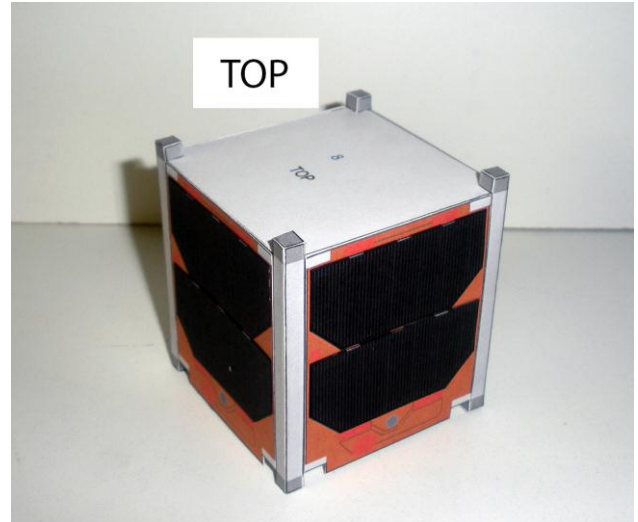

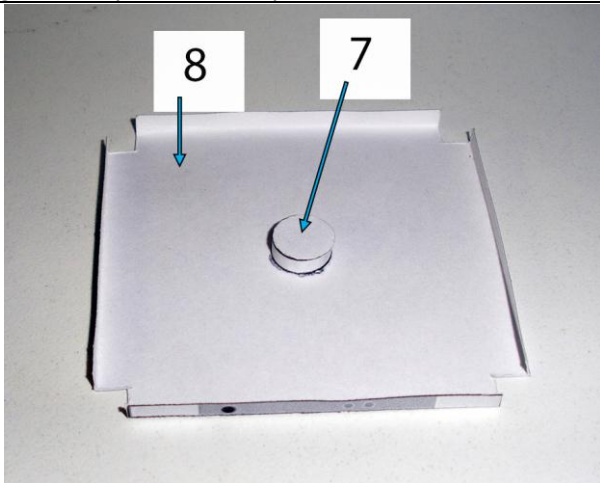

Cut out light blue areas from **part 1**. Color backside of **5, 6** black, shape and glue these with black color inside and glue to the backside of part 1 to cover the openings.

Ends of **part 2** folds into boxes. Cut out the light blue area from **3**. Glue on the body in the area marked "3". Can glue the optional detail parts if desired.

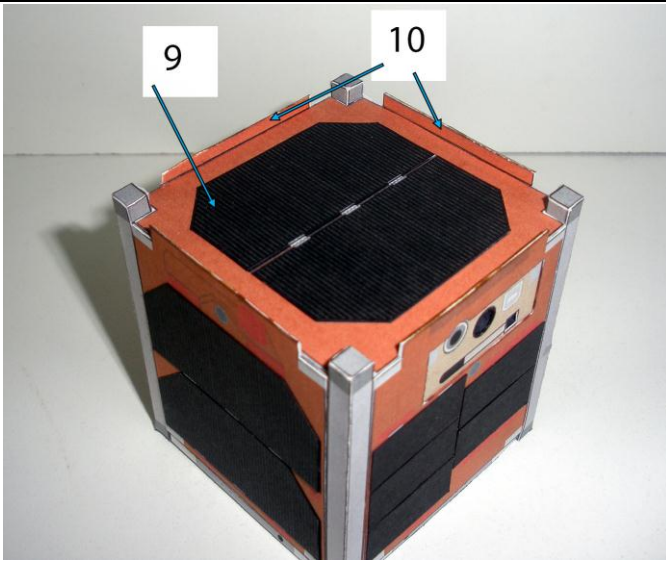

Glue **4** on the remaining 3 sides with the solar cells pointing down as shown. Can glue the optional detail parts if desired.

Cut out light blue circle from **8**. Shape **part 7** and glue to the backside as shown.

Glue **8** to the TOP. Match the two circles on top of 8 with the side with Part 3 as shown.

Glue **9** to the bottom as shown, may need to trim **10** for proper fit.

Your model is done.
